- Weil's disease and severe pulmonary haemorrhage syndrome result in death rates greater than 10% and 50%, respectively, even with treatment. It is estimated that seven to ten million people are infected by leptospirosis a year.**

<https://writerswrite000.wordpress.com/2017/11/02/death-watch-leptospirosis-malaysia-2017/>

Dear reader. Or listener - Bear with me as the report may become convoluted and or muddled. Simply due to my inability to focus due to the infection damaging my brain. The links provide details or make sense of these details.

What is also occurring is a cascade of relentless images of my entire life. I am aware of life from 18 months old which has blown my families mind. But as they say, when you are drowning your life flashes before your eyes. So I may be drowning within my body. The infection which contained pathogenic discharges – from Bed Bugs, from Parasites, from fungus all having been fed on Rat urine and feces.

A lethal combination of death via putrefaction. Infection Date – January 13th, 2017

The ordeal can be confirmed via Vancouver Doctor Lawson Baird and Toronto Dr. David Brule. I did have many other doctors or specialists but they were soon proved challenging by a lack of availability as well their hostile behaviour. I can go and show the doctors in Toronto, the bleeding – or peeling feet – the protruding bone in my left foot. The blood – petechial hemorrhaging in my feet and legs. The coughing up of blood, the comas, the collapsing while walking or running – the going blind- the freezing of the optic nerve – causing a visual mine field as the optic nerve froze with an image that lingered for seconds or minutes but crucial at street crossings. As I tried to cross oncoming traffic seeing a green pedestrian light when it was actually RED. The massive vomiting for 8 hours – with a 15 kilo weight loss and days of languishing in a half world between life and death. That is my Toronto. FOAD! This all took place from 2010- 2016.

Dr. David Brule. 1331 Danforth Ave, Toronto, ON M4J 1N1, Canada
Phone: +1 416-778-0085
Doctor Lawson Baird
2190 York Ave, Vancouver, BC V6J 3X1, Canada
+1 604-733-9110

I saw the Toronto- Hospital orderlies and security climb into a patient's gurney and beat him. As he was struggling and yelling. They did not hide it – in fact they were so aggressive and loud everyone could see and hear. I froze laying in my gurney – praying for God to get me out of here. The Doctor came to see me and I told her what happened. She says – I don't like your answers! So I was placed on 1 week observation, where they tested me for Drugs – Street drugs- The obsession that Toronto has for Street Drugs and its effect on the population. As far as I could see everyone was always – stoned – high – drunk- “lit”. From doctors – to TTC drivers – anywhere and everywhere. 420 the dedicated day for public toking was everyday courtesy by the drug-murder lord – Toronto Mayor Rob Ford, who later succumbed to his addictions and bad behaviour. Murder is bad- still? In Toronto it may be a rite of passage. ? Je ne c'est Croix.

All attributed to Toronto's worsening pollution and climate change.. .People are dying there from an “anomalous” condition based on these causes. So life was reaching a conclusion. The environment had created a cesspool of illnesses. I was told that I had run out of options for medicine as I was either very allergic to them – or as they were mostly antibiotics my body rejected them. The result was a high risk move to Malaysia which allowed my body to naturally heal and get rid of the severe anaphylaxis and the change of the blood from all the antibiotics that they threw at me. Its all a catch 22 in TORONTO.

<https://thebookof25.wordpress.com/2016/09/07/the-bullshit-that-is-toronto-canada/>

What is petechiae?

A petechia, plural petechiae, is a small (1–2 mm) red or purple spot on the skin, caused by a minor bleed from broken capillary blood vessels. Petechia refers to one of the three descriptive types of bleeding into the skin differentiated by size, the other two being purpura and ecchymosis.

Vancouver? I had a serious medical emergency where for 3 years I was allowed to suffer by the many DENTISTS – I SAW! The issue though not just dental was relegated to that discipline that decided they would not treat me – as they said it was too expensive. The bill was \$5,000.00 and they refused to treat me. I was asking for estimates etc. to start a search for the \$\$\$\$. It was a decision taken away from me. The many dentist – orthodontist refused to even give me an estimate– it was a dangerous decision they made. I had a few fistulas – basically a leaking abscess from rotting bone in my jaw. They drilled through one and pus with its rich stench and putrefaction filled my mouth and the air. The dentist and assistants all stepped away, the funk was so loud. And that was inside all of my jaw bone. Why? I have been to many dentists all of my life – so this was hidden or dismissed?

BACK – HISTORY- I had been attacked and brutally beaten to a near death state at 6 years old. The injuries were deemed fatal unknown to me. That damage sat silent – but created bone stones that grew over time and blew my brain of the brain stem. For 3 years I was violently ill. I saw again many doctors – reported to Dr. Lawson Baird. It was during all this first ordeal that the root cause was exposed. A Dr. and a detective came into my hospital room. The questions were regarding the severe head trauma that was deemed by them as fatal. And criminal. The dr. insisted I tell him as I dismissed it as an accident. He got quite serious –“Your injuries are very serious and fatal and unrelated to any accident. You were beaten to death by a 2x4 and sustained fatal blunt force trauma – your skull was cracked in several places. Why are you alive? I have only seen cases like yours in medical books. The patient seldom survives. You have a 1 in 5 chance of getting to 60. You should have died – from this and still can.” My 6/7 year old was fractured by mom, on the terrazzo tiles – slamming, fracturing my head until I blacked out and died. I got kicked as well. 52% of mothers harm their male children and usually by head trauma. This trauma never stopped until I was 40 years old and I never spoke to her again.

They wanted to start a criminal investigation into my mother. But she had to live in the BC province to be charged. Finally the burden was released from me. It was always the elephant in the room. The family penchant for maternal generational violence had finally been exposed. That led to a discussion and an appeal to the family for serious help. It was followed by x-rays and diagnosis. The diagnosis

was a syndrome - based on the violence and a congenital disorder – related to a centuries old infection to the islands of Trinidad and Tobago. I grew up there and that infection was now in all the families of that twin island nation. I am Portuguese and these people in my family are all quite filthy rich.

This specialist told Dr. Lawson he will not treat me – as he stated – he is a dead man walking. He should have died a long time ago. He has a 1 in 5 chance of survival. He gave me a 25 page dossier of what I can expect to happen to me. It listed a massive amount of toxic illness – syndromes – disease etal. It was so brutal – I cried for days. It was a death sentence. I realized that it was not only me but the entire family. So I sent everyone copies to warn them – what happened next was shocking. They disowned me – and never talked to me again for almost 20 years. My old friends in Trinidad told me in Jan- 2017 – they were told I was missing presumed dead in Asia?

They my friends asked me, if I had forgotten – that Trinidadians are not smart and just want to have a good time. And they that Camacho- Gomes – REID – Nunez family freaked out – preferring to ignore and abandon me – allowing me to suffer and die. Something that my mother had stated many times she wanted me to do. This is a fascinating look into psychopathy, brought on by Treponema disease.

I stayed away from Canada and the family and spent years running all over the world to find treatment or a cure. In Korea – Sri Lanka – Malaysia. And I was successful but not this time – in 2017 – I was and am knocking on deaths door. In Malaysia – murdered by a Mr. Jack Goh Cocobay condo) – the Malaysian Medical system – the PMO office – CHC-KL – Dr. Hedy FRY.

In the interim years from 2001 to 2017– 911 occurred. All film work in Vancouver was suspended. I moved to Seoul South Korea – became very successful but suffered many hospitalizations based on what the Vancouver Drs had done. In total it cost about \$100,000.00 US to fix the damage that the Vancouver doctors did. According to other specialists that I saw in Seoul, they said I was butchered. My mouth was aligned in the shape of a Rhombus. That led to abdominal paralysis.

I was hospitalised with a diagnosis of 3 months in bed – tube fed, to allow the body to heal. I had a tube shoved up my nose to my abdomen. No food for the next 3 months. I lasted 2 weeks. It was 2,500 \$ US per day. I had to be moved to a private room as I was in a communal room with very loud Korean chit chat and all the food they brought the other patients. As I could not eat – I had to be moved to a private room. I finally left the hospital as a westerner I have body hair and the nurses said they could not find my veins due to my body hair and could not

place the IV into my arms. I was black and blue from their probing – so I had leave – still ill – but all I needed was the beach – massages – so 2 weeks later I was in Bora cay, the Philippines for 2 weeks. Heal naturally. No drugs, no IV's etc. Just rest, swim (no sharks – no Barracuda) good food – tons of messages, spa treatments etc.

There was a short pit-stop in Toronto to go undercover to save my daughter Allana life. I busted up a ring of home invaders who used underage teenagers and lured them into a crime world through getting them drunk and then bringing in the boys to rob the homes. The parents were home but got the kids to do their dirty work for them. I alone, liaised with the Pickering Police and discovered that these incidents were only identified via #'s and as the kids were underage, their identity was shielded. Seems that history was repeating itself. Within the wonderful world of the syndrome that I had inherited from Trinidad's version of Treponema Disease.

This is what Treponema disease is – The Palladium Palladium – (VDRL)

So this latest venture with Canadian medical systems – Doctors – Dr, Hedy Fry.

- Weil's disease and severe pulmonary haemorrhage syndrome result in death rates greater than 10% and 50%, respectively, even with treatment. It is estimated that seven to ten million people are infected by leptospirosis a year

Why is this all important – as I can die suddenly and soon from lack of treatment. In the end the CHC –KL & Dr.Hedy Fry – sabotaged my life. By denying assistance and contacting the RCMP? No one has responded directly to me. Behind my back – they concluded that I should die.

To deal with all of this I had to publicize – and find advocates to assist me before it's too late. Why all this? – Cause Canada will continue to attack me – sealing my fate. Why? Abuse of power and privilege, corruption, severe narcissism to name a few possible reasons.

I have no desire to go up against Canada for any reason. I am just 1 person - alone – and that makes me insignificant? All Canada has to do is nothing and I am dead man.

The first go-round with Canadian medical care cost me \$ US100, 000.00 to repair the damage from Canada – this one costs me my life. As you see the bizarre reality of Dr. Hedy Fry and Malaysia Medical & ..Wow? So this is Defcon 5. So I need massive intervention via the International courts and the Judges there. I am asking that Pamela Anderson & Julian Assange (etal) and all I reach out to help

me to petition the courts to get treatment – Protect me from Canada – Stop Malaysia from harming and or killing more people – via the actions of Mr. Jack Goh – and Malaysia decrepit medical system.

Canada has universal health care? But it does have significant flaws that cause doctors to be overwhelmed and under paid and patients are neglected. So, where do we go from here?

***Please do not let me die.* This is the solution. Get to Vancouver? Get to the states- Europe? Get to a Thailand Hospital if Canada is having so many issues? Courts? Manslaughter? Attempted Murder? I have no idea how to get out of this.. ALIVE.**

The Long and Short of it- A Summary of Leptospirosis

Please forgive any typos etc. The disease has hit my brain, so I don't see or read as well as I used to. So, I have to admit that my life if not rescued is over. Why?

This is what is developing and I require urgent medical assistance. If not Vancouver then Thailand. ASAP

- This is the document that Dr. Hedy Fry gave to the RCMP- this document can never be given to any other party – as it's contentious, dangerous and misunderstood- and it's a criminal offence to pass such information without my knowledge. The Forces that have this document – THE PMO-JT - THE RCMP- CDC-KL . All unauthorised, all can be used illegally as it has been done in this instance. .
- file:///C:/Users/Cristoph-Dell/Desktop/shortcuts/VIP%20FILES/SOS%20-important%20medical%20file.pdf

The disease in Red are the ones I am infected? With. But I am developing other symptoms rapidly.

- Hantavirus Pulmonary Syndrome expanded.
- Hemorrhagic Fever with Renal Syndrome collapsed.
- Lassa fever collapsed.
- Leptospirosis collapsed.(MALAYSIA EPIDEMIC)
- Lymphocytic Chorio-meningitis (LCM) collapsed.
- Omsk Hemorrhagic Fever collapsed.
- Plague collapsed.
- Rat-Bite Fever collapsed

As the facetious Vice- counsel of Canada stated," You seem to be contacting everyone" and laughs. Then he escalated the events into an international incident. Instead of assisting me, they went into a state that kept from leaving and getting assistance. Executive privileges may exist, but to harm innocent Canadians and interfere in getting medical assistance resulting in my death. Implicating, PMO office- Dr.Hedy Fry & the RCMP.

The issue with Malaysia

So far I have written many versions of the events, which shows my intent to get assistance but at the same may complicate my telling of the events, as I have tried so many times – therefore reported events may become clouded by cut and pasting. But it's the same story.

What I am facing,

Imminent death

A lot of suffering

Increased Trauma especially if I have to get Medical assistance in Canada.

Increased risk of more permanent disease and damages. To my heart, liver and brain.

I am asking that my case be forwarded to: And whoever can assist in this huge process. YOUR HONOR - Fatou Bensouda Oude Waalsdorperweg 10 2597 AK, The Hague The Netherlands. However it's a huge organization and somewhere somehow someone can assist. PLEASE

And that whatever assistance I can get. Its way too complicated at this time.

So let's look at the costs of CHC-KL fiction.

Salaries.

Judith St. George -Embassy / consular in KL- \$186,000 average

Marc-Oliver Jean \$150,000

Justin Trudeau - \$320,000 avg.

The RCMP - \$82,108

Dr. Hedy Fry – Member of Parliament \$235,359

Total: \$973, 467 to have me murdered. Wow interesting!

The problem here is the one of choices. Mr. Marc- Oliver Jean: Vice Counsel had many choices- a world of choices and discretion and he chose a path that causes great pain and suffering on me and indemnity to the PMO etal. How embarrassing for Canada. So far to create these issues – this fiction:-\$ 973,467.00

How far is Canada willing to go to see me permanently harmed? Or dead? So far bidding is \$1,000,000.00 with all the people he contacted to ensure I die.

FAMAZING! Not only is there a deficiency in language skills – but also in Fiscal matters. Very impressive.

- **MPs spent more than \$67 million in employees' salaries and service contracts, \$25 million in travel expenses, and \$15 million in office expenses including cellphones and postage.**

DR HEDY FRY – EMAIL

Also I have to submit a Video - that is in part Crowd Fund raiser. I am in Malaysia. I was deliberately infected with Leptospirosis - that accelerated to Persistent Viral Human Leptospirosis - now its Weils disease - next phase is my death. I went to every Dr. in The region and got a baffling response. NO I dont want to treat you? NO I wil not give you the injection or medicine - we dont have stock. Go to and I was given a list - by this time I was being deformed - and the doctors confirmed they were deliberately not going to treat me ever - and that I must understand - So I being Canadian -went to the Canadian High Commission - where I was laughed at - told a bunch of shit - followed through got Doctors - in Canada involved - went to the Prime Minister - Justin Trudeau - and a MP that is a Human Rights officer - and a Doctor - Dr. Hedy Fry and I showed them the blood - the pain - the drugs - the drug reactions - I phoned them. Meanwhile i a collapsing - stayed in bed for 18 days at a time. Begged for help. As i am spending \$\$on Drugs that do not cure or ? . The news I received is grim far worse - the Rat fever virus can mutate vigorously and if you have any junk Dna - that is usually ancestral viral chain - it can turn it on.

For reasons not known to me - CANADA never responded - I called - passed out on a call - gave details - I was going blind. etc. Then I discovered -

Canada's human rights record has been on display, and the range of shortcomings and violations that have been probed has been sobering. Some are long-standing, such as concerns about sex discrimination under the federal Indian Act. Others are more recent, such as many references to Bill C-51, the new Anti-Terrorism Act. Some of the issues, certainly violence against indigenous women, have an impact on hundreds of thousands of people.

The point of the review is not that Canada is among the worst human-rights violators in the world. Of course not. It is a regular review that comes around for all countries that have signed the [International Covenant on Civil and Political Rights](#). The point, rather, is that all signatories are obliged to protect all rights – and that there is an expectation that a signatory with all the resources and strong institutions that Canada has will set a high example for other countries to follow. That is not the picture that emerged during the review, however. Instead, it was of entrenched problems in Canada, such as the failure to have an effective process for recognizing and protecting aboriginal land rights. And of new and troubling developments that take Canada in the wrong

I wrote a blog to keep me focused as it wil eventually destroy my mind and I will forget all this. I seems that I am destined to die here best case scenario or become crippled that I am useless.

So I have to do something as to be ignored and sentenced to death? I can piece together a choppy montage - unless you have a local film maker in Malaysia willing to do this documentary - as it can not only win awards but shed light on Canada and Malaysia's bizarre hostility to visitors.

Plus the fact that the condo owner who I reported wants to murder me? A wtf moment. How did I get here and why should i die?

As you know this is called MURDER !

<https://thebookof25.wordpress.com/2017/03/27/the-plague-cocobay-resort-leptospirosis-diseases-port-dickson-malaysia-2017-coco-bay-resort/>

Subject: Medical & Global Health Press Officer

To: brienne.prusak@newyork.msf.org

Brienne Prusak

brienne.prusak@newyork.msf.org

Please forward to the appropriate department- without Borders may help save my life..

The story I am relaying I have told many times as I could not get help from malaysia or from Canada and it has fatal consequences. I am asking for advice and treatment as I can not get any.

In Malaysia - I was deliberately infected with Leptospirosis - My Landlord decided to place blankets filled with rat feces and urine in my bed - and T 3am on January 13th 2017 - I was bitten so badly and infected - by 3 different insect vectors - Bed bugs - Parasites and fungus.

Within minutes I was on fire and burning and covered with Massive boils - hives and in great pain. I am on holiday - in Port Dickson Malaysia - I knew no one and was traveling alone. i Called every Hospital and kliink - it was not good – no one listened to me – they said go away.

 [Abdomenxray.jpg](#)

 [Cristoph Blood test March 2016 page 1 001.jpg](#)

 [Cristoph Blood Test March 2016 Page 2 001.jpg](#)

 [Cristoph Blood Test March 2016 page 3 001.jpg](#)

s 3am - and I was by now delirious with fever - and I had some travel antibiotics - that I took and I passed out cold - I tried for server weeks to get medicine and was REFUSED by every Doctor - in a 300 mile radius - They said it was Rat fever - and I was going to die and walked away from me-

I went blind - or my version of blindness - seeing double from every eye - had massive fevers - convulsions and my heart was damaged.

I turned to the Canadian High Commission in KL and they laughed at me. And eventually disconnected from me as I begged for help- I emailed to the PM office Justin Trudeau - the same thing - I reached out - to Dr. Hedy Fry. A renowned MP and a Human rights doctor - and they all refused to take my calls or acknowledge - my letters and phone calls - ?

I have now developed Weils Disease and had severe Brain infections - I have been bed ridden for about 10 weeks now. The Malaysian doctors - admitted to my face - WE DO NOT LIKE TO TREAT VISITORS AND YOU WILL DIE AND YOU SHOULD JUST LEAVE.

I have documented all this and called lot of people who all refused to help -

With weeks left to live - 10 months is the narrative in the files - and with Canada waiting for me to die? I cannot understand how this happened and why - The landlord who did this - has publicly yelled out that he will Murder me - making this very complicated - No one knows that Port Dickson Malaysia is this dangerous and filth ad Rat infections are quite normal - as well as the Dr's hatred to treat any visitors.

I was even refused by Human Rights Canada. I am sending you everything I have. (1) Death is very real and can happen at any time. I am hyper sensitive - the bed sheets hurt - sunlight hurts - I am trying every remedy I can find - I was told by a Dr. To use Arsenic - ? I said you mean arsenicum- ? a HP remedy - he said no - Arsenic as you will die faster.

I also have a horrific gene pool - with sever al strains of Syphilis - from my parents - both VDRL and Endemic treponema and to repair the damage from profound violence - Vancouver doctors - waited for my body to decay and destroyed my jaw - repairs in Seoul Korea - costs - 45,000.00 US \$.TOTAL \$100,000.00

So I have had so many - disease vectors but that when treated with. Chelation therapy - they went away - except for **SYPHIV** - I am sending you everything - to show you how hard I had to fight for my life - that Canada REFUSED all aid and advice.

The Doctors will not treat me - but If i have a written script for drugs or a Request for TEST results they will then do them as long as they are not held responsible.

I am highly allergic to many if not all Antibiotics - due to Toronto.

You have a lot of Canadian doctors on Staff - maybe you can find out why I Was "abused" by Canada. I will have all these documents me at all times - - in the event of death - My dead body will get more of a response than my live one.

To: azamimi@kpjseremban.com, noorashikin.putih@kpjseremban.com, rafidah.samsudin@kpjseremban.com, nor.farhana@kpjseremban.com, shahrizan@kpjseremban.com, amir.marwan@kpjseremban.com

TO - URGENT immediate attention

KPJ Seremban Specialist Hospital

DR RAKHIVINDERJIT KAUR SANDIIU

- **1ST. AS I NEVER RECEIVED A RESPONSE AS I REQUESTED. I CAME TO THE HOSPITAL AND SAW A FANTASTIC DR. AT THE A&E AND I NEED YOU TO GET THIS EMAIL TO HER ASAP - NOT YOUR ASAP AS YOU NEVER RESPONDED AND AS A RESULT I WILL BOMBARD ALL YOUR EMAILS AS YOU REFUSE TO COOPERATE**

DR RAKHIVINDERJIT KAUR SANDIIU

Dear Dr **RAKHIVINDERJIT**,

- **With Back story**

(1) thanks for getting me the treatment but there issues to discuss.

(2) Please see attached pix and info.

(3) Your concern regarding the side effects of the meds - are unwarranted. As you know as I told you - I do not do meds as I am toooooo sensitive and i have an army herbs to take to counteract the liver, kidney etc that any drug - Virless or any antibiotic - so do not be concerned about this -

(4) I am here in malaysia has i had severe anaphylaxis in Toronto. its a very dirty polluted city with the worst kind of pollution - radiation poisoning. Which you would not know. You can watch the videos -- Canada is hiding this from the world.. as it is causing many deaths and especially if you are a new citizen or like me - a world traveler - and as i was born with congenital treponema disease.

(5) As I aged - it brought on many stages and I had to leave Canada many times to seek treatment - as Canada is 25 years behind in medicine except for the money illness- Heart disease - HIV - Diabetes. As these get a lot of funding - its specialists are knowledgeable bit only about the disease and not patient care. Or patient drug reactions. My Asian doctor finally said - get out - and spend a year in Asia. No one knew of Leptosporis

(6) I lived in Korea for 10 years and spent \$45,000.00 on repairing Canada's damage.

(7) So the situation I have to take seriously as the Anaphylaxis has returned - and I have not slept in about 6 weeks.

(8) I left a message to get you to cal me and that also failed. I have to come back to see you ASAP - MONDAY

(9) My friend Gunther in Leipzig, Germany now as Weill disease - an advanced form of Leptospirosis - As does Charles from Manchester England. Uni friends - so this is serious.

(10) I require pills to sleep - I have had Zopiclone on and off for years. It turns out that Treponema disease as you age causes sleepless - Massive allergies - that trigger Anaphylaxis. In Malaysia once i got to the beach area. All went away until the infection. Your staff is very confused as when I asked for more they refused. You cant refuse a patient - who is in this condition. But i am too tired to argue with the staff who simply do not know or care, Remember i was horrifically abused by malaysian doctors - in the past - you are the only doctor to be kind to me,

(11) we were staying at COCO Bay - and the crazy landlord - placed bedding infused with Rat Feces and Urine in our beds. ? Apparently he is a severe alcoholic. I had an email confirming that - but as it took place as we left for

Dumas - Indonesia - we were not clear. The CocoBay rat infection was confirmed by people at the new accommodation as it has a horrible history. of FILTH.

https://en.wikipedia.org/wiki/Jarisch%E2%80%93Herxheimer_reaction

Due to Malaysian doctor relentless abuse (1) not supplying the meds, (2) refusing to treat the condition denying care as I am a visitor??. (3) I have a long list and receipts and videos as it is a big deal to do this.

so I am challenged by a many things. Eventually I will do tests but I want a chance to get better faster.

I do respond well to Alternative meds - so as soon as I can throw this infection off.. the better

The shots were amazing - but lots of fever in sleep - another river of sweat -

So I have many doctors in Vancouver following my case and advising me

- **Brynn Grierson, RN, MSN**
- Patient Care Manager

- B504 - St. Paul's Hospital
- Vancouver, BC
- Office [604-806-9422](tel:604-806-9422)
- Cell [604-417-7524](tel:604-417-7524)
- Fax [604-806-9879](tel:604-806-9879)

- **Dr. Lawson Baird**

- Family practice physician in Vancouver, British Columbia
- **Address:** 2190 York Ave, Vancouver, BC V6J 3X1, Canada
- **Phone:** +1 [604-733-9110](tel:604-733-9110).

Dr. Hedy fry - Member of Parliament for Vancouver Centre
VANCOUVER : Denman Place Mall, 106 - 1030 Denman St Vancouver, BC, V6G
2M6 [\(604\) 666-0135](tel:6046660135)
PARLIAMENT HILL : Room Number 800 Justice Building, House of Commons, Ottawa,
ON, K1A 0A6 [\(613\) 992-3213](tel:6139923213) hedy.fry@parl.gc.ca

I am Canadian travelling through Asia - I need to get vaccines - When can I come -that is a good time and not to BZ. And what are your prices. I will like to come 2 morrow? or Sunday? Apparently its done through your A&E

Rabies vaccine, combo - diphtheria, tetanus, polio etc, hep A/B meningococcal vaccine, typhoid, JE, yellow fever, these are the kinds i am looking for.

- Rocephine injection

- Dapsone tablet:

- - Doxycycline 100mg capsule:

Xanax 0.25mg tablet:

Many thanks

Subject: Re: from Amnesty
To: Aden Seaton <ASeaton@amnesty.ca>

Hi, just in case - after I rewrote all this for your office - I collapsed again simply due to the stress of the ordeal - and repeating it - and it sent my heart beating so erratically. I still cant get medicine to deal with all this. These severe infections - destroy your body functioning. But i will try and find something - I have to. Even though Malaysia is this horror of a reality - I must fight to stay alive. But can I trust Canada. What has happened to my small - simple life?

I have all the emails I wrote to Dr.Hedy Fry - Justin Trudeau, Dr.Lawson Baird and Saint Paul's Hospital. I realized after all this ordeal - that I am very weak - and the danger is REAL. And I cant cope any more. I overwrote to all these people - as the infection damages your brain and I had to get it all out - write all out - as if - I am unable to write or speak due to the infection - stroke etc. At least i did write it in the event of an untimely demise. Which can easily happen from all this.

The disease damages all major organs. Makes you go blind - as in my case I saw 4 of everything. So I was very ill when I wrote all of these people - including the bizarre CHC - KL . I was extremely emotional and erratic at the time. As one would be if one was so heavily infected. I did literally see my life flash before my eyes. And I wrote in a frenzy. I did explain the motivation for all the writing. TO document this as there may be a day/night I might pass on. I did read back some of it - and I was so honest - yikes - emotional - frightened out of my mind - I did apologize for writing or saying anything that was not PC - and I did berate the CHC-KL for being so disingenuous and in my mind unprofessional.

I did read after that on the web- Canada - CHC world wide had a bad reputation and many excerpts even from the local staff - referred to a fiefdom - a hierarchy - of temper tantrums by the Canadian CHC staff - of belligerence and for being disparaging to any that had issues.

So I understand now - I am not alone - and that when i lived in Seoul - I heard of CHC - making the Canadians who turned to them for help - made their lives far worse. And then I found the articles that referenced Mr. Neve - and I - again realized that somehow I had fallen under this umbrella. Dr. Hedy Fry should have responded as she was

outside the political issues - but that proved wrong. Stating that you are Human rights advocates - and yet here I am. NOW I am scared of Canada. of Hedy and of Justin - as the danger has accelerated exponentially - and as I am a ticking time bomb - death can occur at any time. I sent Hedy - a case history that was identical to mine and the man died - everything that he experienced - i was experiencing - including the related infections - that were in his blood and in my blood.

So in the end this only ends badly. In death. Is this what Hedy has become or Justin, have become death mongers? . (Should i send you all that info)

At the time - May 11th. 2017 I had been attacked for the 3rd time by Mr.Goh - as I walked in the streets - where he chased me - and threatened to kill me. I asked for an emergency removal - and was met with laughter from MOJ the chc -kl vice counsel and he just seemed to enjoy my predicament. There was talk of a plane ticket - and i had to provide info - and i did. But what he told Dr. David Brule in Toronto was not what he told me.

I have always avoided this man as he is quite insane. My first encounter was after the infection in February - 12th - he came at me - with chains and screaming - lurching and frothing - (Mr. Yusuf confirmed that he told Goh about the infection and may have threatened him and then he came after me - to embezzle - and harm me -) I was scared as he Goh was unknown to me - I never rented the apartment - it was done through an agent - A Mr. Yusuf - and after the infection on January 13th. Being so weak - i just stayed in bed. I never knew what was about to happen. It is very easy to become a victim of all kinds of crime in Malaysia . Its their stock in trade.. see the attachment. Plesae and thank you.

I avoided any contact with this man - Mr. Goh and I have been asked many times - why did you not - stand up to him. You are much bigger - much stronger - you can take him out- I replied and that is why I cant respond with physical violence - as I am 100 times stronger and with the level of rage and anger he has and the horror that he is -I could harm him - and possibly kill him if i retaliated. So I just avoided. That is why I was counseled to not worry - Mr.goh has no case against me - and when seen by others, i full action - he will be incarcerated. I have only met this man in person 3 x - face to face - and he was always violent and threatening - I have then seen other similar men in his age group - act out like this in public - So the issue may well be - that as he is so entitled to his rage- and easily demonstrates it - its accepted here in Malaysia. i have also seen that as I am often walking on the road to the beach - there is only 1 road - in the town that links everything - so I am targeted - I have had people strangers stop their cars and want to see what was in my bags? or if I am paying for a meals - they will move to position themselves to look into mt wallet and say oh you are so rich. (wtf) a target - that is dying..

Strangers - will drive around me - and keep insisting I hire them.. as in pull their car - right in front of me - block me - so Malaysia is quite violent. I no longer go out - and only at night to buy groceries. I have warned the compound I am in to protect me - and they agreed. When they saw me this week - they asked why they had not seen me in months

- I live in fear and before i go out i have to strategize and be very hyper vigilant - I flinch if a car comes towards me - I flinch if one o these GOH look alikes comes towards me - and again bizarre they will come after me - All of them - they see \$.. they see - ? One restaurant worker knew where I lived and after filing my order - he asked me for a Gift? and i must take him back to Canada? He then showed up a the Condo Gates - and said - the Canadian man has a gift for me? So you are stalked- the only reason I have not moved out of the area was due too the illness and when I was strong enough the last 10 days - this is Malaysia holiday season- so Prices are at Peak value. But I have to move to find more hospitals - Penang in the north borders Thailand and I read that Medical facilities there - were better - due to the high tourist trade.

So in the end I was targeted infected with a Toxic biochemical agent - The Leptospirosis was placed in my Bed? You are only supposed to get it - by swimming in water.. I was infected by the insects that feasted on the Rat urine and feces and there were Bed Bugs - Parasites and fungus - so in the end - only canada can unravel the infection as its a tri-factor of filth based on vermin. I have always ended up in medical records - as I have survived life threatening injuries and infections - only to get them again and again - and not from going after them. So far all the infections came from Humans - infecting with them. A syndrome as per Dr. Lawson Baird. You really need to talk to him.

In my blog - I write all this - I always thought I was going to leave - on my own - This infection was words on the paper until it just devoured me. The blog is very adhoc - simply as i began to dump all the info into it to collect it - and then sort it out later - I thought - I was gone by March - By April - and then time disappeared - its now July - OMG - how can this happen?

I have been keeping a video journal

<https://thebookof25.wordpress.com/2017/03/19/the-return-of-the-plague-cocobay-port-dickson-malaysia/>

<https://youtu.be/KiAZb0dYcSo>

https://youtu.be/px_SMdOQDno

<https://youtu.be/zHsKszsLkg8>

https://youtu.be/p_ArY7rz9Ps

These may be the only lasting footage - of what I have been through - Canada knows all this - as In Dr.Hedy Fry - Justin Trudeau - Dr.Lawson Baird etc

Caermichael <cristoph00cdc@gmail.com> wrote:

Well- I am not sure ? - I wrote a number of questions as a check list.

Please prevent me from Dying here from a dangerous disease . Inflicted on me - Doctors refused to treat me - I may only have weeks - to maybe 3 months left to live - so you tell me ?

How do I get back to Canada to Dr.Lawson Baird to follow up on the 20 year diagnosis - that was so severe - no one believed it and I lost my entire family over it. It was that traumatic and severe and yet what it outlined did happen. NO matter how careful I am. A holiday that turned deadly - with no Medical help available.

Justin Trudeau and Dr,. Hedy Fry -know (Hedy has a personal connection to my mothers family 6 degrees of separation. So i turned to her for help and got nothing. I sent her very private medical documents - . that went into the hands of unauthorized govt staff -- It could only be seen by Hedy - and no one else - as its part of the syndrome and its also related to Trinidad. But - ? nothing - I called a few times - and the material I sent was written a la minute- during all the horrific episodes - i am only better after 20 days in bed - and the ingestion of massive amounts of pills - that were given as - I cant help you - just take what you have until it stops was the dr. Response and if that does not work - Try Arsenic.

So you please tell me what you can do? As there is all kinds of wrong here - and if you dont know anything about Malaysia - ? I had no idea - until I was in so deep - and massively infected.

Has my passport been comprised by Canada?

- **Why did all the Malaysian doctors deliberately mislead me – and deny treatments and tell me to go to every other doctor and or Klinik in a 200 miles radius?**
- **Why did the CHC – KL deliberately ill-treat me and be so disingenuous to the point that – it delayed all my attempts to get better? Marc Oliver Jean seems to be? Challenged in dealing with serious matters? The issues were suppressed by CHC as this is a long term outstanding issue. Leptospirosis – Malaysian condo and property owners regularly try and extort funds – from visitors.**
- **Threatening my life.. at every given turn.**
- **Why was I placed in more danger by CHC – and Dr. Hedy Fry?**
- **Why was sensitive medical files forwarded to other non –medical staff by Dr.Hedy Fry;s office. These files are so sensitive that if given to others staff – then my life can be placed in greater jeopardy. (Please ask me about this)**
- **As The Malaysians I encountered are so corrupt – and tried to extort funds from me – have they compromised my life further? My Passport? It is used as the major document and I have videotaped many records of them attempting fraud on me.**

- Malaysian Companies like the Trefoil condo Management? TM the phone company?
- Mr. Goh and the Goh Family – deliberately placed highly fatal infected bedding on my bed. Leading to my possible death.
- Mr. Goh further demanded and attempted to extort funds from me – with Paper work that was not relevant (extortion) – and publically verbally months after I had left Cocobay – May 11th. Screamed out and chased me in a parking lot at Perdana apts. I will KILL YOU.
- All the medical costs that I was forced to bear from this delinquent people. The Gohs.
- I have no idea what they have done. ? I was only told not to initiate any legal procedures against the Malaysians – as since its an attempt to extort funds and to kill a stranger to the region. It is very serious. I must wait if there is any legality to be told what it is? As I have all or THE PROOF – of complete innocence then it will turn the Legal system against the Malaysians who are making these false claims and then I can be resolved.
- Meanwhile the illness and risk of death increases.

Passport photos suck - so just in case – my passport

Please forward to the appropriate department- without Borders may help save my life..

The story I am relaying I have told many times as I could not get help from Malaysia or from Canada and it has fatal consequences. I am asking for advice and treatment as I cannot get any.

In Malaysia - I was deliberately infected with Leptospirosis - My Landlord decided to place blankets filled with rat feces and urine in my bed - and T 3am on January 13th 2017 - I was bitten so badly and infected - by 3 different insect vectors - Bed bugs - Parasites and fungus.

Within minutes I was on fire and burning and covered with Massive boils - hives and in great pain. I am on holiday - in Port Dickson Malaysia - I knew no one and was traveling alone. i Called every Hospital and klink - it wa

 [Abdomenxray.jpg](#)

 [Cristoph Blood test March 2016 page 1 001.jpg](#)

 [Cristoph Blood Test March 2016 Page 2 001.jpg](#)

 [Cristoph Blood Test March 2016 page 3 001.jpg](#)

s 3am - and I was by now delirious with fever - and I had some travel antibiotics - that I took and I passed out cold - I tried for server weeks to get medicine and was REFUSED by every Doctor - in a 300 mile radius - They said it was Rat fever - and I was going to die and walked away from me-

I went blind - or my version of blindness - seeing double from every eye - had massive fevers - convulsions and my heart was damaged.

I turned to the Canadian High Commission in KL and they laughed at me. And eventually disconnected from me as I begged for help- I wet to the PM office Justin Trudeau - the same thing - I reached out - to Dr. Hedy Fry. A renowned MP and a Human rights doctor - and they all refused to take my calls or acknowledge - my letters and phone calls - ?

I have now developed Weils Disease and had severe Brain infections - I have been bed ridden for about 10 weeks now. The Malaysian doctors - admitted to my face - WE DO NOT LIKE TO TREAT VISITORS AND YOU WILL DIE AND YOU SHOULD JUST LEAVE.

I have documented all this and called lot of people who all refused to help -

With weeks left to live - 10 months is the narrative in the files - and with Canada waiting for me to die? I cannot understand how this happened and why - The landlord who did this - has publicly yelled out that he will Murder me - making this very complicated - No one knows that Port Dickson Malaysia is this dangerous and filth ad Rat infections are quite normal - as well as the Dr's hatred to treat any visitors.

I was even refused by Human Rights Canada. I am sending you everything I have. (1) Death is very real and can happen at any time. I am hyper sensitive - the bed sheets hurt - sunlight hurts - I am trying every remedy I can find - I was told by a Dr. To use Arsenic - ? I said you mean arsenicum- ? a HP remedy - he said no - Arsenic as you will die faster.

I also have a horrific gene pool - with sever al strains of Syphilis - from my parents - both VDRL and Endemic treponema and to repair the damage from profound violence - Vancouver doctors - waited for my body to decay and destroyed my jaw - repairs in Seoul Korea - costs - 45,000.00 US \$.

So I have had so many - disease vectors but that when treated with . Chelation therapy - they went away - except for *SYPHIV* - I am sending you everything - to show you how hard I had to fight for my life - that Canada REFUSED all aid and advice.

The Doctors will not treat me - but If i have a written script for drugs or a Request for TEST results they will then do them as long as they are not held responsible.

I am highly allergic to many if not all Antibiotics - due to Toronto.

You have a lot of Canadian doctors on Staff - maybe you can find out why I Was "abused" by Canada. I will have all these documents me at all times - - in the event of death - My dead body will get more of a response than my live one.

 [teeth xray.docx](#)

Dear Sir

I am in a serious life threatening situation in Malaysia and the situation has become so complicated. The literature says most if not die within a 10 month time frame - Its now 7 months. Please as I am experiencing some neurological defect due to the intentional fatal infection on January 13th. 2017 and the lack of treatment as per all parties that were informed. So I have written much - I started to blog about this and never imagined I wold be in this position. So the information is all there but your preference may

be different to my adhoc approach. So if there is any apparent confusion its due to the severe infection that untreated as damaged me - making my death a reality. I read/write this and I am so overwhelmed as I have written to a few before and I received no replies and I called as well. NOTHING - The silence is deafening and deadly. I had to find a track record for you to show you I tried very hard to get help.

I am doing what i can - and I am still running to Hospitals all over Malaysia (I m planning to goo to a town known as Penang - 8 hours by bus away..to find Vaccines - Shots - I am repeating treatments i had at the beginning - they dont cure - but with my TCM and my Ayurveda treatments I am keeping death at Bay. The narrative of a cure has a 6 mth hospital stay - on severe IV Antibiotics - so I have to get better as if that is the case - due to the complications place at high risk. Again the documents i have to show you - the ones that I gave Dr. Hedy Fry - Hedy staff sent this PRIVATE CONFIDENTIAL INFORMATION INTO THE HANDS OF STAFF NOT CLASSIFIED TO HAVE IT and again raises alarm bells. Im in so much danger. But if I die from this - make sure its not in vain.

The key document I cant send it to you unless we speak - I am in Malaysia a 12 hour time difference - and with the illness at times hard to cope. I wrote all the information in the past 2 months - when i was going blind - etc. And i called Dr.HedyFry and Dr. Lawson Baird as he is very aware of the this genetic syndrome i have.

Apparently its rare - (but only to Canada) Common in Portuguese (I am) Raised in Trinidad and lived / visited 30 countries this far. In Canada the Syndrome is very active ? and in Malaysia all was well until January 13th. And it turns out the infection mimics the congenital disorder and as i have not been treated - made it deadly. Its very complicated. I will call you but its more likely to be phone tag.

*** An independent, democratic and self-governing movement, funded by supporters around the world.**

Dear Mr.Neve – this is very serious and I need assistance to understand what to do? In a few weeks – I may not be alive to discuss any of this. So please help. I have written many document's to Dr. Hedy Fry and? Nothing? Dear Alex I have many emails and phone calls to these 2 as they are I thought my main allies. ?

DEATH BY LEPTOSPIROSIS -

Dear Dr. Fry, Dr.Lawson Baird – St.Paul's

I know I have sent you a lot of info. Sorry about that - The situation is not something I have ever experienced and does seem an awful lot has gone wrong - and I need advice which i can't get from CHC KL - ? For reasons that add to the BIZARRE of this experience.

(1) To recap the infection started on Jan 13, 2017

(2) I did try to get help but no one ie Dr.s, Hospital etc. Would NOT assist. In the end i took the emergency meds and I did keep asking for medical assistance. As the weather was rainy - I just slept a lot and treated the infection, unaware of its real nature. Essentially I have no memory now of that period, it was a blur of fevers and poxes - only awareness of February 27.

(3) By the end of February- I had many complications - my heart was going crazy - turned out to be damaged - its permanency was? as it was on the cusp and it would depend on medication and a resolution to the infection.

(4) I was heading to Dumai - Indonesia - a short boat trip to get my Final Visa chop - and then leave Malaysia for good by April 1st. Back to Canada.

(5) The day to depart had arrived but i had collapsed again. February 28.. The agent who had assisted in the apt at cocobay and was coming on the trip witnessed my collapse. he said that he called Malaysian immigration and it was okay to overstay based on the illness and to have all your documents - bills - receipts etc as proof. That concurred with what i was told at KL airport upon my last entry / exit - They said - I was organised gave them everything in the correct order and that I was a nice Canadian. There was never a threat as imposed by the vice counsel - MOJ. To this day - I am baffled by the circumstances that CHC did. There was no communication that resulted in any change to my circumstances and though I had followed the MOJ instructions - I instead got responses from Dr. David Brule that seemed to be contrary to what I had discussed. As the events have become blurry - I lost my vision around that time - May 11- on wards - for about 3 weeks. But there was no further communication from MOJ/ CHC. Which

only complicated events, as I needed to understand what I could do. With the body showing increased damage - I could no longer cope and reached out to you. Dr.Hedy Fry.

(6) In March the reality of it being a Rat based infection known to be fatal - was confirmed and I was really very ill. I had also encountered the continued Madness of the Goh - the crazy landlord of cocobay - I was never contracted to him or his organization - I was a guest of the agent. The infection he admitted to as he acknowledge that he was the caretaker and had placed the filthy bedding for me to use. And from then on he continued to harass me. The agent disavowed any billing as it was rented Free of any electrical bills. Then it went into crazy land - with him attacking me - and coming with bills from 2016 to force me to pay. Basically extortion. I videotaped parts of the exchange - as this man was so violent.

(7) I packed ready to leave - for April 1st. I had strained myself as i was too weak. And that night had the worst headaches - and fever - and then - I felt something burst in my head- and I saw blood when I wiped my heads with my hands. Then I was out cold - Something had happened and later maybe 8 hours later I woke up? Very disorientated - at first I thought it was a bad dream. But I had no more pain - after passing out - and i looked at my pillow and I found blood smears?

(8) I went to the doctor Vijnay - who said - how do you feel - I said I have no idea as I was ok - but blood came from head - through my ears - I assume ? He said well it happened only once so no real issue.

(9) The Rat diseases has a very definite list of issues that include Hemorrhaging. and organ damage. He acknowledged yes, its deadly. That was all.

(10) He. Dr. Vijnay of Asia Klinik did also confirm that as a foreigner NO doctor in PD would ever document or record or treat me - He indicated that he was doing me a short term favor and to go find others to assist.

(11) Dr. Vijnay knew of my struggle to get assistance. I left many messages - emails etc. With my body so infected I was not able to keep up - I had made a real connection to Sunway Medical Hospital in KL and their reputation was for excellence - instead they were very sloppy. I had asked them to help me - they wrote that they had no specialists on had for this condition. A known condition in Malaysia? and no meds. All untrue. My situation became critical and increasingly fatal -again when I tell people in general these experiences - they say welcome to Malaysia. All also recounted - well you are going to die. No one who has this disease in Malaysia to the degree you have it lives.

(12) June 2nd Dr.Tan at Sunway Medical the medical doctor on staff - met me - I was told he wanted to see me? In the process of speaking with him - He said why have i not seen you before? I asked who he was and was told that he was the dr.,. That treated infectious diseases. He listened to my by then complicated story

- **admitted yes that Doctors in Malaysia will usually not treat foreigners and deny treatment and medication.** I go into shock so easily. I went there - i just freeze - i could not believe that with all my emails and requests to the SM hospital, that they had since March - denied to treat me - or see any specialists. That they also emailed the CHC - and told them the same. Misleading the CHC – who now are no longer in communication.

(13) I showed him the letter of May 25th that said they did not have the meds - nor could they recommend any. In fact - the Dr. said I treat Leptospirosis many times and I have the medicine. He said what they wrote - Chaim Huey was inaccurate. From March till June – critical time wasted.

(14) He wanted to do tests? I said what kind of tests? As by now I had been told that it was too late for general testing- that the disease with its violent rashes - heart issues - fevers was indeed now Viral Persistent Human leptospirosis. And that tests for proof were no longer required. So again what tests? Just tests to see how the body was dealing with the infection. I said...-As by now you have confirmed - that your Hospital is very negligent that all of the paper work I had sent in and brought in - were not in the file. And now you wanted to do tests - for a check on the body stasis? And they denied you exist - to the point that I am in real danger of dying. WOW! As after 6 months and poor meds and Drs. Who know nothing – they use GOOGLE to diagnose and treat – illness. Unfortunately due to the genetic complications brought on by – lack of treatment. The tests have to be very specific as the infecting agents were tri – fold. And now mutated. To ??.

(15) **I also thought that I was leaving soon for Vancouver. A kind Samaritan will purchase a Plane ticket to get me back to Canada when am free to go. But I require 30 days of no symptoms – NO MORE RASHES – NO MORE FEVERS – NO MORE SEVERE REACTIONS TO THE ANTBIOTICS THAT MIMIC A HEART ATTACK. NO MORE SPASMS OR TICS – STRENGTH IS REQUIRED.**

I now had the proof of a deliberate attempt to harm me - and that i could never recover (in Malaysia). In all of my emails and conversations - with the WHO and the Pharmacy company- Sanofi that made and did not have the vaccine. That whenever I mentioned Sunway Medical center - The first response was good they are reputable - what did they say - I said - they had nothing, no drugs - no doctors - to treat this .. That was met with - What - Sunway told you this - IMPOSSIBLE - they are one of the best. He says - You should have insisted - ? I of course did and continued to do so. **But in the end - with this Malaysian DOCTORS PREFER NOT TO TREAT FOREIGNERS** - a known sub fact - I did not get far. And I was told go here - no go there - I called these other places to find out ? They were 2 hours away - so once again - with whatever language skills - they did not possess and after months of illness, horrific abuse.. I could do no more.

(16) I did try to go out but the blindness - to walk out there in the heat - etc - i got very dizzy and nauseous, so it was back to bed. I had started to contact Thailand and the hospitals there - as i have to get out of this hell -

(17) With the CHC taking a hostile to me position, unapologetically disinterested and fostering what can only be seen as contempt. Being Kind, considerate or assisting was not in their vernacular. I was also out of any of their restrictions – they heard what they wanted to hear, not what was real. I could have easily have left – but ? The problem is if a Vice counsel laughs at your predicament – offers assistance and then vanishes. My only life-line to Canada. This is al way too hard and insurmountable.

. It seems that in their lofty position of Embassy staff - they are not aware of the "real Malaysia" That the corruption that is described - is ubiquitous and I had gone from Bad to worse to near death and that they could not treat me with any normal courtesy or respect. Yes they said they could fly me but they wanted - I suppose proof? But when they spoke toDr, David Brule - they just disappeared. In Toronto I was horrifically abused by these Doctors and David was the only 1 that witnessed and assisted the many emergencies - Coma - vomiting for 8 hours -- feet burning off - lumps in my chest - blood being thrown up. All due to Anaphylaxis, in the end and the allergens were all over Toronto. And when at the start of the infection and I contacted Toronto - here is what was stated. *Please contact a local doctor as Dr. Anthony Chen can no longer advise you out of the country.*

(18) By now I have read everything I could find and what is clear is that this is deadly. That the non-treatment had made me critically ill. And that with my congenital infection for me this was guaranteed a passage to death. Also as the blood tests had to be so specific to identify and treat the causes of the infection. The disease vectors that infected me were - Bed bugs - Parasites - and fungus that fed of the Rat feces and urine. Those pathogens have to be isolated and drugs specific to them used as i had by now gone through all the Broad range AB. so NO bueno.

(19) if the literature is correct - the patients either died immediately as in 3 days - or by the 10th month. its been 6 now and I am going into massive sepsis - the organs are all under attack. And failing to some degree.

(20) So I have to regroup? Think of alternatives? Thailand – THC – as I cant get back to Canada. As well as – I have to think of death and what to do about the body. The disease can cause cancer – can cause paralysis from sepsis- heart attack.

(21) To ensure that I get the message that Malaysia is this violent. I have to go to the beach / sea every day. But as I have to treat the body with intensive poultices to draw the toxins out – and promote rapid healing, I used Mustard Oil and Tumeric. I became better and I turned a gold color. Suddenly I was attacked by Barracudas in the sea. They chased me out of the water and followed me to the beach and they darted back and forth in about 1 foot of water – at the shoreline. I have footage now that the lagoon on my doorstep is a Barracuda Nursery and due to paler skin - I am an amuse bouche.

This horrified me as I was now unable to go into the sea- as now the attacks were coming from every source.

- <https://www.theglobeandmail.com/news/national/canadas-human-rights-plans-fraught-with-peril-experts-and-activists/article35258625/>

- **Has my passport been comprised by Canada?**

- **Why did all the Malaysian doctors deliberately mislead me – and deny treatments and tell me to go to every other doctor and or Klinik in a 200 miles radius?**

- **Why did the CHC – deliberately ill-treat me and b so disingenuous to the point that – it delayed all my attempts to get better? Marc Oliver Jean seems to be? Challenged in dealing with serious matters? The issues were suppressed by CHC as this is a long term outstanding issue. Leptospirosis – Malaysian condo and property owners regularly try and extort funds – from visitors.**

- **Threatening my life.. at every given turn.**

- **Why was I ill-treated by CHC – and Dr. Hedy Fry?**

- **Why was sensitive medical files forwarded to other non –medical staff by Dr.Hedy Fry;s office. These files are so sensitive that if given to others staff – then my life can be placed in greater jeopardy. (Please ask me about this)**

- **As the Malaysians I encountered are so corrupt – and tried to extort funds from me – have they compromised my life further? My Passport? It is used as the major document and I have videotaped many records of them attempting fraud on me.**

- **Malaysian Companies like the Trefoil condo Management? TM the phone company?**

- **Mr. Goh and the Goh Family – deliberately placed highly fatal infected bedding on my bed. Leading to my possible death.**

- **Mr. Goh further demanded and attempted to extort funds from me – with Paper work that was not relevant (extortion) – and publically verbally months**

after I had left Cocobay – May 11th. Screamed out and chased me in a parking lot at Perdana apts. I will KILL YOU.

- All the medical costs that I was forced to bear from this delinquent people. The Gohs.
- I have no idea what they have done. ? I was only told not to initiate any legal procedures against the Malaysians – as since its an attempt to extort funds and to kill a stranger to the region. It is very serious. I must wait if there is any legality to be told what it is? As I have all or THE PROOF – of complete innocence then it will turn the Legal system against the Malaysians who are making these false claims and then I can be resolved.
- Meanwhile the illness and risk of death increases.

The disease - mutated - Becoming **Persistent Viral Human Leptospirosis** and then now its **Weils Disease** – and I went blind again – massive fevers – pain etc. I contacted the Canadian High Commission in KL great disaster.... they (vice Counsel) laughed at me – told me to do stuff - I did – and then they just disappeared.

I then contacted Dr. Hedy – Fry in Vancouver – gave deets including dangerous medical information – if in the hands of non-medical staff, they can seriously harm me. Then I contacted (cc) Justin Trudeau – as the situation if not treated – well I am a dead man. But its murder – oh crap – So I contacted more to get help and it was the same. The best Klinik in town confirmed June 2nd – that the Malaysian doctors will refuse treatment and medication due to the risks. So I was sent on many a wild goose chase – horrifically abused by the Malays and Canada? ...

□ **Dr. Fry – there are 6 degrees of separation with her family and mine –In the pain and fear - I wrote and over wrote – collapsed on the phone while speaking to her office – And with all this seriousness – I never got a response – except my Private Medical documents – that were only for a Dr. and a Human rights personnel were forwarded to parties – that will destroy me – (Pls ask me about this)**

- **So my Justin trudeau knows – and nothing**
- **My Doctor Lawson Baird knows and nothing**
- **Dr.Hedy Fry knows and nothing. The literature on this disease and my genetic makeup put me in very risk – it states that those infected exactly as I – die within 10 months,**

This Canadian woman Pamela Steele – responded –directly to me - ." Honestly I don't know what to tell you. My youngest son worked over in Malaysia for a few years and he ended up contracting some strange 3rd world virus that was going critical. He spoke to the company he worked for who sent him home. What I finally did was put him on a program involving Olive Leaf extract, and it took about a year to get him healed. After that the company pulled out of Malaysia due to the number of incidents with my son and other employees dealing with a variety of weird illnesses. I am really sorry you're dealing with all of this. (she will talk with you and give more information as there is History and its all suppressed.)

The following is the reality of Malaysia. Never come here. It's a disaster! And no one seems to be aware of it. As its all suppressed.

Dear Dr.Hedy fry, June 20th.

I found the emails from the past - and I added to it. The Results from the pharmacist. What a mess. I also may have been leaving a message at your office. I came to with the phone in my hand. And I knew I wanted to call you but did not or it could have been Lawson?

Yes, the disorientation is real. Im stating this as - I have a hard time understanding how I got here so fast and help is so far away. Or that I could be placed in such danger. Its improbable that I reaching out and making as much as an effort to get help, could be in this abyss of non-response. I have no idea what is going on - or what to do? I am hoping that though I am not informed - that attempts may be made to assist? I am in agony - high anxiety- Insomnia - fear of all types - everything is becoming a blur - past -present future

I was following up with asha.chandren@international.gc.ca just letting you know I am pursuing this asap - Again sorry for the Malaysian Miscommunication - I did as you did and followed their instructions and it ended up in me contacting you - as I was so misled. What they say is not what they do. Which led to the illness damaging my heart.

Thanks.

Subject: Re: Fwd: I have been exposed to / infected with leptospirosis

To: smc_inthelpdesk@sunway.com.my, asha.chandren@international.gc.ca

I am coming into YOUR Emergency to see the doctor there. At your clinic there. I am registered as a Sunway Patient due to anaphylaxis. The Doctors in PD are useless and stocks are low - they and the hospital and the Govt Clinic have limited stocks?? Possibly due to high demands of these products here in Port Dickson. Its a high lepto region.

June 20th. Dr. Hedy Fry - the doctor's low stock was a deliberate lie. A fake fact. I am on a ton of allergy pills. And as such went to get refills and had with me Medovir - flagyl - Avenoir. The pharmacist saw these items and said - here we have these products and I am including the scans. This is cheap over the counter medicines- that anyone can get. Its not even a treatment for Leptospirosis or weils disease. Its for chicken pox and or shingles. Maybe for a mild exposure to leptospirosis or asap exposure- ?

So this entire drama- could have been prevented. I did not have to get this ill- on my way to fairly certain death. By now or some kind of neurological damage. That may be permanent. VIRLESS -apoatenol? ACYCLOVIR is virless.. Dr. Tan even advised not to take it? Even if prescribed. This is way to crazy a situation - I have to get out if here - soon. I realized that the attacks were predicated by bursts of large activity. All normal - but it indicated what could happen if i am not stronger. So all that I wrote previously came from exertion - as in taking a bus into town - normally 20 minutes - it was 65 minutes that day. Which made try and understand - how to travel out of here.

Also it proves from a Human rights POV that a Canadian patient was deliberately infected with a fatal disease if untreated. That all these Malaysian doctors - due to the unspoken rule until it was stated to me by Dr..Vijnay in March and Dr. Tan of Sunway Medical on June 2nd. That Malaysian doctors will not treat or prefer to not treat visitors to Malaysia. It does not matter what the CHC found out - I had done al the background prior as the illness was devastating. They would be told as I was, where to go and then when I went to find it and buy it. Was denied. I was told get out and go somewhere else from January 14th.

All this is well documented by now.

Therefore I did not overstay. It was a medical issue that became a crises. Blown out of proportion by the defunct Malaysian doctors.. With my life at stake. My joints are being attacked. I am not arthritic or? but something else is happening. Sepsis?

I did call and look for other Doctors and was told of a Klinik (spelt Malaysian style.) And its far away on the Thai Malaysian border with a town called Langkawi. Its a tourist town so they according to the blog - provide better services. It is an 8 hour journey by Bus - 1 hour by air. I may have to investigate that Klinik in person as - whatever communication I receive will be misleading.

I just do not know how to proceed? If I go there and get better. ? Would I then - if I can be allowed to leave - go to Thailand? And then to Vancouver. With no assistance of any kind. I really do not know what to do? Can you advise. Please and Thanks.

CDC

They referred me back to KL and I can easily come to you as there is a direct Bus to KL and the train goes to your Hospital. Here in the Port Dickson due to a severe lack of transportation and other hospitals are much further way then you

are. Plus I have a Patient history at your hospital. I will be able to get it from there as i have in the past. I just did not know the costs. As i simply asked for costs - I still required the COST of ROCEPHIN as its IM - and all you I hoped you would do was just give me the costs. So If you can respond ASAP - as you see it took many attempts to reach you.

Thx

Cristoph

Hi Christopher,**

Below are the requested information:

- Rocephine injection (This medication can be injected through 2 different routes, IV and IM, as well as have 2 different strengths, 1gm and 250mg. Both different formulation and different strengths are of different price. However, we are unable to advise without Dr's prescription)
- Dapsone tablet: RM 27 for 180 tablets - (Outpatient Price) [The vendor has discontinued manufacturing this product. Product is available while stock lasts]
- Doxycycline 100mg capsule: RM0.45 per capsule - (Outpatient Price) [Unknown duration and frequency, hence unable to calculate the amount required]
- Flagyl 200mg tablet: RM 0.15 per tablet - (Outpatient Price) (over the counter)
- Xanax 0.25mg tablet: RM1.55 per tablet - (Outpatient Price) [This is a highly regulated item and there may be limit to the amount dispensed. Please note that the MO will not prescribe unless he visits our psychiatrist, OR presents a suitable legal prescription - must be acknowledged by pharmacist]
- Atenolol 50mg tablet: RM1.40 per tablet - (Outpatient Price)

Subject: Human Rights Centre- Dr.Paul Hunt

To: comms@essex.ac.uk, paulhunt28@yahoo.co.uk, phmhunt@essex.ac.uk

Professor Paul Hunt,

Dear Sir, I require your assistance. This is a doozie and I hope assistance can be given? Also now that this has be taken to places by Canada? I am very afraid. I cant imagine this situation nor that its - ignored? Canada is not the country it once was and as I lived internationally for a long time in the past - I had heard rumors that if you contact the CHC in any country as a Canadian for help. They will make the situation worse.

I have to get back to Vancouver - but if its a hostile situation what chance do I have?

C

Human Rights Centre

Telephone [+44 \(0\)1206 874736](tel:+44(0)1206874736) (general enquiries)

First of all - I am deeply sorry for the passing of Professor Sir Nigel Rodley KBE. Due to my horrific situation - i decided to Google about Canada's human Rights and was dismayed that Sir Nigel was not only keenly aware of Canada;s violations - but as I was baffled by the non responses as well as the strange - unprofessional remarks ad conduct of the CHC in KL - my life is in danger. As in death could take place in weeks.

I am in a very dangerous situation and I require some advice. I am/was on Holiday in Malaysia. When disaster struck. On January 13th 2017 prior to my leaving Malaysia I was deliberately infected with what turned out to be then was Leptospirosis which became Viral Persistent Human Leptospirosis and now weill's disease. Immediately upon infection I became violently ill and started a baffling - hunt for Doctors - Medication and I was routinely denied and finally after months of trying to get care - I was told by 2 doctors - 1 a local doctor in port Dickson and the Other a Large Medical Center in KL that the doctors here in Malaysia PREFER to not treat Visitors and will deny them treatment and medication. I had contacted the CHC in KL in March once i saw this at the time unconfirmed dangerous pattern. I thought they as the CHC would no better - but as it turned out they did not. As the infection was placed in my bed via the housekeeper - LL and it was one of the most fatal in the world. If untreated and or even if treated it must be in time - as all cases were eventually fatal. The Rat feces / urine colloquially known as Rat fever is a very established disease here in Malaysia. As this was an act of violence done to me - I did report to the authorities. My Visitors visa expired February 28th. I was told by immigration it would be okay - just bring my documents to prove it. But in speaking to the vice counsel of CHC-KI he emphatically stated that I was facing arrest for an overstay. Then said they would provide transport back to Canada. The Vice counsel behavior was quite unusual and proved disingenuous. I asked for advice and never received a response. So as time was passing and the illness is very dramatic. Fevers - massive poxing - periods of blindness - weakness - my heart was immediately damaged etc. As the CHC -KI was so bad - I contacted Dr. Hedy Fry in Vancouver, a month ago - via phone & email. I received no response. In a few short weeks I may no longer be alive. I wrote incessantly as there was/is neurological impairment - and I could lose my memory and or develop issues that due to sepsis, could no longer speak. Hedy refused to respond. So does Canada want me to die. I have details and more but soon there will be a dead body. Please advise. Here is a more complete article on the situation.

 Subject: these x-rays show the old injuries that are acting up
 To: hedy.fry@parl.gc.ca, "Grierson, Brynn [PH]" <BGrierson@providencehealth.bc.ca>, David Brule <dbriverdalehomeopathy@gmail.com>, Ourem Castle Information Centre Protocol Partners <ouremcastleinfocentre@gmail.com>, Ian Robertson <icr5050@gmail.com>

These x-rays show the old injuries that are acting up .. I thought i could control it - but its going in directions - that indicate increased harm - i though the memory loss or the strange stiffness and weird mucus or the poxing was going away - but its not - as it advances - meningitis - encephalitis are occurring as i have no doctor - and soon if i

lose my voice - cant report more - but i think this is all - unless other bizarre symptoms occur but they are so many

Dear Dr. Hedy Fry, Dr. Lawson Baird – St. Paul's - ccPm office
I am hunting all over Malaysia for a doctor or Klinik to help me.

Up to 13 different genetic types of *Leptospira* may cause disease in humans. It is transmitted by both wild and domestic animals. The most common animals that spread the disease are rodents.

- **Weil's disease and severe pulmonary haemorrhage syndrome result in death rates greater than 10% and 50%, respectively, even with treatment**

Leptospiral infection in humans causes a range of symptoms. Leptospirosis is a biphasic disease that begins suddenly with fever accompanied by chills, intense headache, severe myalgia (muscle ache), abdominal pain, conjunctival suffusion (red eye), and a skin rash.

The classic form of severe leptospirosis is known as Weil's disease, which is characterized by liver damage (causing jaundice), kidney failure, and bleeding.¹ Additionally, the heart and brain can be affected, meningitis of the outer layer of the brain, encephalitis of brain tissue with same signs and symptoms; and lung affected as the most serious and life-threatening of all leptospirosis complications. The infection is often incorrectly diagnosed due to the nonspecific symptoms. Other severe manifestations include extreme fatigue, hearing loss, respiratory distress, and azotemia. Organ failure, internal hemorrhaging, and death can result if the bacterium infects the liver, kidneys, and other major organs.

<http://www.medicalnewstoday.com/articles/246829.php> Dr, Hedy Fry it is not contagious.. Alleluia, I was so worried even if the dr.s were not – it's ghastly to look at? And experience but this is the part that is scary. Losing Memory – and all these neurological fades - if the brain is affected, meningitis, encephalitis, or both may develop. And that was what I am trying to say happened. These are all occurring randomly.

- **A blotchy skin rash,**
- **Confusion or disorientation**
- **Drowsiness**
- **Fits or seizures..starting**
- **High fever**
- **Nausea**
- **Photophobia, or sensitivity to light (in the tropics)**
- **Problems with physical movements (sepsis)**
- **Stiff neck (sepsis)**
- **Inability to speak- that is why all the writing – I may lose my ability to speak.**

If the lungs are affected, the person cannot breathe. This is the most serious and life-threatening of all leptospirosis complications. In severe cases, there may be so much effluence that the patient chokes.

Patients with severe leptospirosis will need to be hospitalized and given antibiotics intravenously.

Hospital stays may range from a few weeks to several months, mostly depending on how the patient responds to antibiotic treatment, and how severely their organs are affected or damaged.

I had hoped to have heard from you by now so that I can plan how to get out of here. As I am dealing with a complex medical issue and with NO proper drugs and care it is so dangerous.

Last night, the leptospirosis poisoning has returned at an alarming rate. Suddenly – it had stopped and was getting better? But then it surged again. I only offered alternatives to getting out of Malaysia via Indonesia or Thailand in the hopes that I can do so. As CHC in KL, seemed to be avoiding communication, disappeared and as I have no idea what that meant. I assumed I was either to get worse and die here in Malaysia. Or make it happen on its own- if I was not so weak – I would have left months ago- but I keep collapsing. **BUT I AM CALLING ALL OVER MALAYSIA**

Dear Dr. Hedy Fry, Dr. Lawson Baird – St. Pauls.-ccPm office

I am hunting all over Malaysia for a doctor or Klinik to help me.

Up to 13 different genetic types of *Leptospira* may cause disease in humans. It is transmitted by both wild and domestic animals. The most common animals that spread the disease are rodents. I CANT FIGURE OUT WHAT TO DO- SO PLEASE RESPOND

- **Weil's disease and severe pulmonary haemorrhage syndrome result in death rates greater than 10% and 50%, respectively, even with treatment**

Leptospiral infection in humans causes a range of symptoms. Leptospirosis is a biphasic disease that begins suddenly with fever accompanied by chills, intense headache, severe myalgia (muscle ache), abdominal pain, conjunctival suffusion (red eye), and a skin rash.

The classic form of severe leptospirosis is known as Weil's disease, which is characterized by liver damage (causing jaundice), kidney failure, and bleeding.¹ Additionally, the heart and brain can be affected, meningitis of the outer layer of the brain, encephalitis of brain tissue with same signs and

symptoms; and lung affected as the most serious and life-threatening of all leptospirosis complications. The infection is often incorrectly diagnosed due to the nonspecific symptoms. Other severe manifestations include extreme fatigue, hearing loss, respiratory distress, and azotemi. Organ failure, internal hemorrhaging, and death can result if the bacterium infects the liver, kidneys, and other major organs.

<http://www.medicalnewstoday.com/articles/246829.php> Dr, Hedy Fry it is not contagious.. Alleluia, I was so worried even if the dr.s were not – it's ghastly to look at? And experience but this is the part that is scary. Losing Memory – and all these neurological fades - if the brain is affected, meningitis, encephalitis, or both may develop. And that was what I am trying to say happened. These are all occurring randomly.

- **A blotchy skin rash,**
- **Confusion or disorientation**
- **Drowsiness**
- **Fits or seizures ..starting**
- **High fever**
- **Nausea**
- **Photophobia, or sensitivity to light (in the tropics)**
- **Problems with physical movements (sepsis)**
- **Stiff neck (sepsis)**
- **Inability to speak- that is why all the writing – I may lose my ability to speak.**

If the lungs are affected, the person cannot breathe. This is the most serious and life-threatening of all leptospirosis complications. In severe cases, there may be so much effluence that the patient chokes.

Patients with severe leptospirosis will need to be hospitalized and given antibiotics intravenously.

Hospital stays may range from a few weeks to several months, mostly depending on how the patient responds to antibiotic treatment, and how severely their organs are affected or damaged.

I had hoped to have heard from you by now so that I can plan how to get out of here. As I am dealing with a complex medical issue and with NO proper drugs and care it is so dangerous.

Last night, the leptospirosis poxing has returned at an alarming rate. Suddenly – it had stopped and was getting better? But then it surged again. I only offered alternatives to getting out of Malaysia via Indonesia or Thailand in the hopes that I can do so. As CHC in KL, seemed to by avoiding communication, disappeared and as I have no idea what that meant. I assumed I was either to get worse and die here in Malaysia. Or make it happen on its own- if I was not so weak – I would have left months ago- but I keep collapsing.

Or think of other ways – my situation was always critical and worsening. So as there was reluctance from CHC –KL – I contacted you as a medical doctor and a person of greater I assumed understanding of this complicated issue.

The poxing usually has sever fevers – so I am waiting to see if that returns – if I am taking the meds? Not intended for this infection but for mild herpes. A-Virals as prescribed – which are harsh – I can't take the Heart meds - etc. It's a very complicated regime of ineffective Antibiotics – Antivirals and Heart Meds..

With the poxing – there is incredible itching – and a massive overall skin –body sensitivity – I can see that my muscles on my body have detreated rapidly – with my arms and legs becoming spindly and weak. Compared to a few weeks ago or even months. And the range of symptoms has increased. From Heart eyes, headaches – fevers – blindness- weakness – rashing first poxing second– insomnia – the choking on mucus – the heart stopping – memory loss -all intermittent – and random. But Persistent.

I am on – Dapsone – Doxy- AstraZeneca- acyclovir – a lot of antihistamines – vitamins to help – buffer the drug side effects. I have a \$record of the drug – vitamin bills and they are very high. So that is the compromise I have had to make- Misled – Denied by Malaysian Doctors – who by the way – by not treating me in January- Refusing – I would have been well enough to have travelled on my own – and not be conflicted by being delayed in leaving or anything. The longer I stayed the worse I got. I never imagined or planed beyond leaving in February, going to Thailand and on to Canada. I had made all he travel arrangements that had to be canceled. Many times.

I realize now that from the onset the issues I had here were all generated by the Malaysians inability to function as an integral whole without corruption and fraud. The Bank thefts, the Phone Company, the Management – LL are all corrupt. Fake Bills – charging fraudulent amounts – damaging property. They were so crooked in every interaction that has led to the loss of my life if it continues.. The “murder attempts” x 3 by the Goh Family? D'july as well. This is beyond any reality that I ever knew. And Persistent. I had to fight many small battles monthly – meetings and every time – they said sorry- sorry misunderstanding.

What concerns me as well – is that my Passport is my ID – for everything – and as they have showed me that they will defraud me or anyone – this is not about me – its Malaysians – They even went in and changed by Bus times – based on my name – A foreign name – If they can change my bus ticket info. Can they can mess with my passport. ?

I have documented everything – videos etc – simply – to avoid any denials on their part. For instance – the internet provider came in and installed – then either another branch of the same company or rival – removed it – within an hour. This went on for days and then management meetings - where they apologized and continued trying to defraud me. Then fake bills etc. All fought. All won – but the corruption is mind boggling. A segue to the Medical system denying me – and stating that they did not have doctors or drugs to treat me – with an infection placed in my bed to infect me.

The longer I have stayed the worse it's become. I am not staying voluntarily – I am damaged – trapped it seems – and dying from a deadly disease. The Dr. Vijnay was selling me the questionable AV at 2 times market price. I discovered on June 2nd. This leptospirosis was placed in my bedding. The Dr's refused my requests for assistance and denied me drugs. Compromising my life until I collapsed. And was detained – bed ridden for months. No wonder I am so exhausted – and that Memory loss is real – if I had not documented it – I would have forgotten about it.

- I contacted these offices – previously. Contacts: Dato' Wira Syed Ismail Syed Azizan, Director, Commercial Crime Investigation Department Bukit Aman Blok G, Kompleks Pejabat Kerajaan, Bukit Perdana, Jalan Dato' Onn, 50502 Kuala Lumpur. PA: Ms Khatijah, Tel: 03-2616 3701, email: dir.ccrime@rmp.gov.my
- General contact details for the Royal Malaysian Police: Bukit Aman Police Station Phone: +60 30 2616 3822 (redirected to the Secretariat JSJK) rmp@rmp.gov.my <http://www.rmp.gov.my/>

I had to report the condo Management in regards to damage to property that they authorised and sanctioned, knowing that my ll was in default, placing me in a dangerous position. . All videotaped. That I was renting. So as I left January 1 2017 – and was at coco-bay January 3rd – and infected on the 13th January – 2017 - and the rest is history. Malaysia and the Malays operate on a level of harm that is extraordinary. I was taken on a journey by a resident of Trefoil in Shah Alam were I was staying. He was a known protestor of the carnage on Malaysian roads where many people were killed not due to speed but sinkholes – pot holes. He had become famous for his acts of actually fixing the roads and had pioneered a movement.

Hedy, without intervention I may not live much longer. The disease is overwhelming me – I am losing the will to live – from the disease – its attacking on levels that are frightening. If there is memory loss – muscle loss – a virulent infection. The choking.. ? From thick clear almost gelatinous mucous – not flu mucus – its starts with a strange sensation in my sinuses – and then seems to gather momentum towards this gagging discharge. What is all this?

It's not contagious I have checked – and the 2 doctors that examined me – did so willingly – Dr. Vinay and Dr. Tan – and I did ask. They said No – I asked, will I die from this – We don't know. No probably not? But that was months ago. As for Dr.Tan, he was baffled by Sun Meds administration denying me – assistance and tell me and CHC – So far circumstances of such a dastardly nature as blocked me from getting medical assistance. Even if I get back to Vancouver tomorrow – the doctors may indeed have a % of a chance to save my life. I can't imagine being told – If only you could have come sooner – we could have saved your life. These circumstances are not ruled based. The rules that have led me down this path – dissolved. A very impaired man Jack Goh – alcoholic – and mentally deranged – (all this from Cocobay security) performed a criminal act. Continued to utter this act – enraged – in front of the public - I will kill you.

So – my contemplating anything of my own rescue – is flawed as I am too sick. I will have to go to Immigration and present all these documents – It took me 28 hours to write all this – on and off – the minute I do anything of this nature the stress of it – I just

crumble and I literally fall asleep – as in pass out. Way to weak. I really need your advice. How do I do this?

Indeed Mephisto's Waltz of bizarre circumstances - It may .. be the last thing – I know and do. Trying to get help. As the poxing suddenly returned last night – with all its itching – sleeplessness – and my inability to function... I fall into despair. But as the disease progresses – its known to do this as well. ? Weils Disease.

People will ask why leave Toronto? Here are some of the dramatic pix of what Toronto did to me – Include 2 comas – 2 chest lumps – several hours of vomiting about 16. Bell's Palsy – Kawasaki syndrome featured below.

My feet burnt off – from something in TORONTO.

High – low blood pressure – depends on the month – 40 pound/ 22. Kilos... weight gain in 1 mth without food being the cause. Feet Bleeding – Feet turning ICE Blue – Collapse I the street – same area – 2 years apart at Spadina & Bloor – same time of year – but same location – same dr. I Attendance Dr. David Brule –Feet that burned off ? All blood tests were normal ish. Meaning that what I experienced was not represented by any aberrant test results all with in normal. It was

deemed environmental – allergic – anaphylactic -

Plus a lot of people so high on drugs all the time. On the street- driving cars and public vehicles – racial epithets –being screamed at random – by random people – Toronto was out of control.

So if all I had to do was take a break and rest in a warm climate, do nothing no script - drugs of any kind and then whatever was causing this to be discovered but In Vancouver as Dr.Lawson Baird and I are a good team. I had to solve this – but Malaysia had other plans. Everything that I am telling you Lawson knows. Please help.

Subject: these x-rays show the old injuries that are acting up

To: hedy.fry@parl.gc.ca, "Grierson, Brynn [PH]" <BGrierson@providencehealth.bc.ca>, David Brule <dbriverdalehomeopathy@gmail.com>, Ourem Castle Information Centre Protocol Partners <ouremcastleinfocentre@gmail.com>, Ian Robertson <icr5050@gmail.com>

these x-rays show the old injuries that are acting up .. i thought i could control it - but its going in directions - that indicate increased harm - i though the memory loss or the strange stiffness and weird mucus or the poxing was going away - but its not - as it advances - meningitis - encephalitis are occurring as i have no doctor - and soon if i loose my voice - cant report more - but i think this is all - unless other bizarre symptoms occur but they are so many

Dear Dr. Hedy Fry, Dr.lawson Baird – St.Pauls.-ccPm office
I am hunting all over Malaysia for a doctor or Klinik to help me.

Up to 13 different genetic types of *Leptospira* may cause disease in humans. It is transmitted by both wild and domestic animals. The most common animals that spread the disease are rodents.

- **Weil's disease and severe pulmonary haemorrhage syndrome result in death rates greater than 10% and 50%, respectively, even with treatment**

Leptospiral infection in humans causes a range of symptoms. Leptospirosis is a biphasic disease that begins suddenly with fever accompanied by chills, intense headache, severe myalgia (muscle ache), abdominal pain, conjunctival suffusion (red eye), and a skin rash.

The classic form of severe leptospirosis is known as Weil's disease, which is characterized by liver damage (causing jaundice), kidney failure, and bleeding.¹ Additionally, the heart and brain can be affected, meningitis of the outer layer of the brain, encephalitis of brain tissue with same signs and symptoms; and lung affected as the most serious and life-threatening of all leptospirosis complications. The infection is often incorrectly diagnosed due to the nonspecific symptoms. Other severe manifestations include extreme fatigue, hearing loss, respiratory distress, and azotemi. Organ failure, internal hemorrhaging, and death can result if the bacterium infects the liver, kidneys, and other major organs.

<http://www.medicalnewstoday.com/articles/246829.php> Dr, Hedy Fry it is not contagious.. Alleluia, I was so worried even if the dr.s were not – it's ghastly to look at? Subject: Just in Case -An apology

To: justin.trudeau@parl.gc.ca

I am thankful for Justin Trudeau. I am putting forth a lot of energy trying to stop the passage of this disease I am afflicted with. I have been very open with Dr, Hedy Fry in humanizing the situation.. Day to Day survival - I have so far gone blind - or in my case I saw everything in 4s - which meant I could not see. I have been in bed it seems for days - I have lost time - In January - I was not aware until February 26th. And that continues - its June - how did I get to this sorry state?

The severe poisoning - burns my body like acid - this disease destroys you at an incredible rate. Today I could not remember my password for the computer - it took an hour for me to remember.

I write in case I lose my ability to think and remember - the horror of the infection and the continuous assaults - this disease does have the ability to kill you from 3 days to 10 months.

I remember April but not May- so as I'm getting worse - I will probably just stay in bed more - I read something earlier that I sent - it was so irrational - and not a sign of any emotion to anyone but the reality of having a *breakdown* from a disease known to cripple your mind.

That was why I was trying to leave - before I was more incapacitated with the Malaysian doctors confirming that yes - they did not want to treat me and lied about the Doctors on Staff or medication for the reason I was only a visitor. And that these AB are inadequate

- I experience such a nightmare of illness - and to know it was deliberately - I really have no idea of what to do or say. As any normal to me path is now long gone. So I hope you have mercy on me - if i perish - before i am saved - forgive me - and thank you.

The disease in Red are the ones I am infected? With.

- Hantavirus Pulmonary Syndrome expanded.
- Hemorrhagic Fever with Renal Syndrome collapsed. The fact that I am hemorrhaging already ?
- Lassa fever collapsed.
- **Leptospirosis collapsed.(MALAYSIA EPIDEMIC)**
- **Lymphocytic Chorio-meningitis (LCM) collapsed. Sepsis / Meningitis**
- **Omsk Hemorrhagic Fever collapsed.**
- **Plague collapsed.**
- **Rat-Bite Fever collapsed**

Subject: Education: Royal College of Surgeons in Ireland,
To: hedy.fry@parl.gc.ca, ouremcastleinfocentre@gmail.com

Dear Dr, Hedy fry, I was trying to think how my mother knew you - she said it was school but more to the point - You went to school or the same school with my Uncle - Dr. Vity Gomes - Royal College of surgeons in Ireland. Vity lives in Regina Saskatchewan. It was interesting - that the last time I spoke with Uncle Vity was the day - he phoned me - to support Jacky - I am never confrontational in this issue of the damage and the assaults that led to several near death experiences and thousands of \$ in medical rehabilitation in Seoul Korea. You see for years I knew about you through my family- so I am not sure if it was due to San Fernando being so small - BTW - I did a scholarship to study Medicine as well but the injuries and the disease flared at the same time - a pattern at 21 that surfaced now every 10 years.. so i was so careful - it would take the act of a deranged man to poison me with a deadly poison - I simply wanted to discuss with my then family how to deal with all this - I was fresh out if surgery - had my entire jaw demolished - my life

suspended - after 2 years of being bed ridden - to be told that my injuries cant have been that bad - as Clothilde Gomes - Granny was much worse - and she beat the shit out of all of us. Which was my point - Jacky could not it seems differentiate from a fatal assault - on her 7 year old son - versus - the drama of her own life. As my sisters and I went independently searching and archiving the family history to find out why our lives were so hard and difficult. we discovered a lot of serious dysfunction and brutality ..

I with my kids - was very different - I just loved them - and they certainly did a lot wrong - but I thought reward them - love them -praise them - be kind - and to a large degree it worked - until I was away - and the issues with my ex and the family genes took over - they back stabbed me - 30 pieces of silver - et tu brutus

Jacky was very open about her mania with me -- and discussed her tantrums- admitting them - but denying any result. It can't have been that bad, she stated many times. Well once I was at that Vancouver General and the dr. had asked me who did this - he had the police there with him - to take my statement - as the injuries were fatal - and they listened - they said - in the end as she was not in BC - they could not charge her- as she was in Ontario and there was no statute of limitations on this crime. And they said - I did not have to charge her - that the crown would charge her. As I could never have survived that assault. I did not - I knew I died and talked about and i was never the same -

Yikes - so naturally I never talked to her again - not out of hatred or dislike - Fear - and a sense of dignity - as this could never resolved in this lifetime - and as I said I lost my entire family in 1998. Through acts of incredible violence - that has followed me to Malaysia. Out of the blue - all this took place here - and I have less than 2 months left to live

So - I hope and pray - i have no sense of time anymore - it blurs - this may be a funny anecdote- to heal this scars and to reduce the anaphylaxis I go into the sea for hours - and mediate and do yoga on the shoreline - and suddenly i was attacked by a shark..

Something started to bite my back - I turned it bit my stomach - I turned again - my thighs - and then i realized I was under attack from? I was oily so there were no marks - I ran jumping and splashing - not a clue what was the attacker - it went after my feet as it got shallower- and i turned to

see a 6 inch shark - 6 inches and it was attacking me - that shark / Barracuda had balls - but then I went oh crap where are its parents - ? There are many vicious critters here in Malaysia - if we ever meet remind me to talk about the contagious miasma.

And we should talk about Trinidad and the affects of its legacy in all our lives. There was a naturalistic doctor on Vaughn and saint Clair and after I saw her - she said I filled in so many gaps as to why her clientele mostly west Indian were suffering with so much bizarre illness and they would also go to the obeah store next door and i had presented her with why there were these links between disease and the occult from Trinidad - Jamaica and Guyana.

Treponema diseases or Zoonotic infect the brain – medulla Oblongata – causing powerful hallucinations. The Brain has many archetypal references and for reasons I am not aware of – these universal archetypes are heavily referenced – during the infection. As per Moruga Trinidad 2010.

Hedy Madeleine Fry, PC, MP is a Trinidadian-Canadian politician and physician. She is the longest-serving female Member of Parliament since winning eight consecutive elections and represents

Born: August 6, 1941 (age 75), San Fernando, Trinidad and Tobago

Office: Member of the Canadian House of Commons since 1994

Party: Liberal Party of Canada

Children: Jeremy Fry, Douglas Fry, Peter Fry

Books: Maternal and Child Health: Report of the Standing Committee on the Status of Women

Subject: Sorry for the whiplash of events and its an emergency -
To: hedy.fry@parl.gc.ca

I guess it might be a tad confusing. Simply due to a bizarre stream of bad luck - or Misadventure, this situation has escalated - but not from me per se. I am just reporting it as it evolves - and hence the confusion.

This was always a deadly disease. It required immediate medical care - that was and continues to be denied. CHC may have been confused by the Medical system advising them - and then as I followed through - or had been on the hunt for Medical assistance and was routinely denied. if you have read the Trial by Frank Kafka - you may recognize a similarity of disambiguation of the medical system writing to me and the CHC - and I running around all over Port Dickson - and KL - and phoning everyone - to get assistance.

I too more than any one was and is baffled - its my life so I had to be hyper aware of this reality From the onset this disease, the condo - the people was dramatic - the fevers - the poxing - boils etc. and the neurological degeneration - all out lined in its - prognosis.

So I had to fight. But as I was so ill my reactions were slower. ----- Forwarded

Subject: Sorry for the whiplash of events and its an emergency -
To: hedy.fry@parl.gc.ca

I guess it might be a tad confusing. Simply due to a bizarre stream of bad luck - or Misadventure, this situation has escalated - but not from me per se. I am just

reporting it as it evolves - and hence the confusion. If you have been contacted by a Medical Doctor saying what I wrote - it would have been better. but instead I was misled- all I can do is write about the experience and hope I survive it.

This Leptospirosis was always a deadly disease. It required immediate medical care - that was and continues to be denied. CHC may have been confused by the Medical system (mis)advising them - and then as I followed through - or had been on the hunt for Medical assistance and was routinely denied. if you have read the Trial by Frank Kafka - you may recognize a similarity of disambiguation of the medical system writing to me and the CHC - and I running around all over Port Dickson - and KL - and phoning everyone - to get Emergency Medical assistance.

I too more than any one was and is baffled - its my life so I had to be hyper aware of this reality From the onset this disease, the condo - the people was dramatic - the fevers - the poxing - boils etc. and the neurological degeneration - all out lined in its - diagnosis, my prognosis is poor. It is a fatal disease.

So I had to fight. But as I was so ill my reactions were slower. I did not at first realize I was actually being denied or that the reality they did not want to treat me at all. So the runaround was real - they will say to your face - or on the phone yes - they have it (does not mean - that they will) This is Malaysia, they speak out of each side of their mouth.

I was told by Dr. Vijnay - yes we dont want to treat you - as you are a visitor - and the risks are high? What risks ? I asked - there is only risk to me, I insisted. He says well, we know its rat fever illness.. but there are certain steps that were missed. You should have come immediately - I said i did - I went to the Hospital - here in PD - Dr, Vijnay says first mistake never go to a government Hospital - they will easily kill you. Plus you stayed at the worst resort famous for its FILTH.etc.

It goes on and on as you know- June 2nd was the pivotal point when Sunway Medical an established fairly famous Hospital - which had for months - denied me - sent emails to the CHC to tell them they had no doctors or meds etc.

The attachment establishes - that we - and I being the most to loose, my life, followed up - and if you react to my deterioration -its a real deterioration of my physical life - as the illness progress it can create schizophrenia - Renal - Heart failure etc. Respiratory failure I am losing the will to live - not by choice but by infection, I force myself to eat. I seldom leave the condo.

And they had all the time - it, the Malay doctors - did not matter that they lied to the CHC - as well its just another foreign govt.or that CHC was just providing a 411 service.

So again any off notes in communication - all due to - rapid deterioration to my body. Months of poxing - high fevers - heart disease - etc. Made worse as I was vulnerable to it from my genetics and earlier life. I could not ignore it.

I was living it - I was running around, being deliberately misled - and as the situation escalated - i became erratic - due to its fatality. Its very hard to keep composed when you are being eaten alive - chased by a Madman - GOH - and all these dramas. Of course reporting all this - reads as I? - but it was all - happening to me - no where i turned here gave a good or + result. And the Malaysians call it the Malaysian welcome.

I fear there is a failure in communication - and that I may loose my life here - due to these dangerous people.

As you can see I did try to consult with you. And as the situation is so unpredictable and i have no guidance - and those i turned to for help were ? Again not having ventured into these dangerous water in this manner - I have no way to understand why I will loose my life here in Malaysia.

Please help I simply do not know what to do. All this has done is created a worse nightmare for me as everyone seems to misunderstand or worse - Again I only turned to Dr. Hedy Fry as an advocate. A powerful humane doctor of exquisite ability Who ticked off some boxes that I needed, or so I thought. A relationship to Trinidad and to San Fernando. To the Gomes - Camacho Family or knowledge of them. Of some of the unique influences that Trinidad as in its culture - and the genetics that came from there. Of Canada and its complex and troubled medical care that exacerbated my condition and created greater complications - much as malaysia has done. One Toronto was accidental ? though similar in its outcome unable to give medical assistance when needed. Malaysia brutal,

To what happens to men as they age and are disenfranchised by their family. My family had a very strong maternalistic line and an impoverished male line on 2 fronts. Only 1 Male per generation - and 5 females. As well - cultural dynamics that went all wrong. My line that I know came from Madeira Portugal from 1895 - to Trinidad -to Canada. There was little known of the gene pool - beyond hard working Portuguese migrants that made fortunes, that by the time i was born in 1958, life was different. Elite..but not to last. Hedy may have been able to assist me and save my life. A very small life. But what is occurring to me - occurred to my father..

At 52, my father died alone in Hollywood Florida - he died of an overdose - accidental or intentional ? But he had me - as I had warned the family be careful Dad is going to Pass on November 11 and his body discovered November 13th. So I got the phone call on November 13th his body was found. So a parallel that I have is that I am alone here deliberately infected with a fatal disease if not treated - with a complicated Medical that required - extraordinary vigilance on my part. Due to idiosyncratic genetic markers not known in Canada but in the places where Treponema is recognized. So no matter what I said - I could not reach Canadian medics - and my test readings were always off. So my journey here was

very simple - get better - get to Dr, Lawson Baird- figure out what to do to save my life? - Simple - i did very little here in Malaysia it was simply get better - no script drugs - no antibiotics - no pills except for vitamins.

It took years of suffering and research to understand what killed my father and drove him insane. It took years to determine what powerful congenital forces were at play. That were fatal, diabolical etc. It was in Korea they confirmed treponema disease. It was mentioned in 1993 in Vancouver that this family had congenital issues. Not just mine but all. All branches of the family.

Which meant I had to gather info from as many --- and it in the end replicated the experiences and reactions of not just myself but all members. The Canadian families were destroyed. by it. The T'dad seemed to cope better but the outcome was the same - their lives as families fell apart but after 40 years versus Canada of about 10.

I shared very personal and confidential material to Dr. Hedy Fry - simply my honesty - the danger I am in if not assisted in time and I needed her help.

I do apologize if my simple request became complicated or controversial - who knew that asking for emergency help would cause this. Not me - I just dont have the strength for it. I have resigned that I may sadly die here - but I did try when I had strength to solve it. It was more than I can bear.

<dbriverdalehomeopathy@gmail.com>, Ourem Castle Information Centre

Protocol Partners <ouremcastleinfocentre@gmail.com>

Dear Brynn - I am only looping you in. Not asking - as these circumstances are way out of Control. I had contacted CHC in KL in May and they requested I get all arrangements firmed up and set and have your care providers - allow us access to them to discuss the situation. So that meant I had to contact you and keep you informed.

I thought you were aware of this. If there are delays its not due to me - CHC said - that they can organize a flight but ? As the illness is debilitating and escalating - There is a short moment of time to fly out - in between the heavy poxing - the powerful surges of infection that have at times blinded me - affect my memory (hence all the Writing) and causes me to choke - gasp and stop breathing - all when I am sleeping.

This has made delayed as it took 3 weeks to clear my symptoms away. *The fact that i could start choking on a flight from a sudden discharge of strange mucus that surges - and chokes my airway -? This had happenned a few times over the*

past month - in May and then disappeared and then resurfaced suddenly this week - Usually it was milder and could be cleared - but the responses that have returned were far greater. Involving me running to the bathroom - gasping for air - and trying to spit up this gelatinous clear mucus?

If I am on a 15 hour flight and this happens - Disaster - if i cant get out of the seat in time - make it through the aisles to a bathroom that is open.. If people see this reaction - gasping for air - spitting up - retching - if i dont breathe - then its a heart attack - unless all this is a precursor to a heart attack? Way too dramatic - so I am fighting for my life in many ways. All this from these Malays whose only purpose it seems is to kill me ?

As Malaysia, its doctors, hospitals, Kliniks confirmed that they refused to treat me - denied access to doctors and to medicine - in writing and in Person confirmed yes we usually prefer NOT to treat visitors to the country especially when they have contracted in your case - Leptospirosis. We dont want the paper work or the issue as this is an issue that is usually fatal.. and the guy says - Understandably we have to be careful - so we deny you.

Its a 15 hour flight back - and I have to be strong enough for that. Alternatively - I am trying to get to Thailand - 1 hour by air - or 8 -12 hours by Bus. Get some treatment as Malaysia none - and I contacted Dr. Hedy Fry office for advice over a continually escalation of this situation and how to work out logistics that keep harming me -

The infection is not waiting for treatment -which it never received and its getting worse..

Or alternatively Dumai - Indonesia is only a 3 hour ferry ride - Im sure I can get a hospital there to stabilize me - i need IV of Antibiotics and hopefully - after that get a flight back. But I have not really been out of the apartment in about 3 weeks. Its way cheaper there - but who knows the medical standards?

If I do not update you - it will be misunderstood - if I update you its misunderstood. you see if i can get to Van - and this condition is much worse - I am hoping at least there is a record - and if I am in a state that does not allow me to communicate - and since it has affected my memory and my ability to communicate has deteriorated - ? This is my only and last resort. So please do not delete any of this - as i have no idea - what to expect.

I have gotten worse over the weeks - Bad meds - no sleep - neurological impairments - organ damage. So I am back on the TCM - which has bought some relief from the drama but its only the past 24 hours - i just could not find anyone here - as the language is an issue.

Note that - the writings is bold so I can read it - eyesight is poor. I see I have many typos - and never saw them as my eyesight is a real issue.

So anyway - as help did not arrive in time - and I have to get help? I am giving myself 2 weeks to get better - By July 1 - maybe i am strong to get to another border country and get medical help - and then- get better and go to Vancouver. I thank you - but this situation was so dire and what happened to my communication unfortunate. It may all be too late by Vancouver - so now its prayer - and quiet.

I have a tape in my head from the 1 doctor who diagnosed the condition in 1998 - Past due - should not have lived this long - severe fatal injuries - never makes it to 60. 1958-2018 plus my dads death. His from overdose mine from neglect.. yikes

I know - its just that - these people the CHC are playing games with my life. All I can do is share the experience so that when we meet you understand- cause again as this disease marches on - who knows what condition i will be in - i have really bee open with Dr. Hedy Fry - hoping that some of the trini kinship will - its easier to get help - from someone who knows about you and Trinidad is so small - that people that are my or were my family - or friends will have a connection to Hedy - the family of my birth was ridiculously famous and we are all interconnected. The town were Hedy and my mother went to school is so small - that the families will know each other,.

At 59 - I can now tell a trini - if the family moved in some circles - who they were related to. I met Chad Camacho - who would be a 3 rd cousin and when I asked who his mother was - she was also my cousin - and all the people I knew who have had kids - would be Chads age - and I can say - so you know Aunty Simone and Uncle Nicholas - and then go on - so its fun - but i will need extraordinary help to break these so called diplomatic barriers - that I did not create. Malaysia is a mess - i will send you what i wrote dr. hedy - as it will make her laugh - and think a lot - I think one of my aunts knew her well. ? and may have gone to school with her in London England - that is how small Trinidad is

So far Malaysian politics and madness is destroying my life.

This madman GOH is stalking me waiting at my Bus stop - why - the problem is that he is crazy - and a small man - if he comes after me and tries to strike me - I am about 100 pounds heavier than him - and as he says he wants to kill me - it does mean I have to hurt him badly - so that is why I run away - not from fear of him - but fear of what will happen to him - if he strikes - he is so drunk - so maimed - that in 2 seconds he is on the ground - ad will probably be killed - as it wil not take much - he is 5 foot 4 - and weighs about 130 pounds - i am 6 feet and 230 - so my caution and reluctance to avoid conflict is not out of fear of him - but what I will do to him.

plus if i arrive in pain or agony or delirium - a 15 hour flight - add the airport time - about 5 hours to get there - if i am poxing - its a nightmare - cant sit still - and it the itching makes you scream as its a stinging sensation makes you want to scream - and the pus and oozing and fevers and if it breaks out on my face - they could put me of the plane etc .. this is me normal - this is me in hell - when you see me - my ex kids and my grandson Elliot - who was told i am dead - lovely family -

Well, i did not think as he referred me to Sylvia Lai as he works as an attending. But to me - or you may not mean much. Dr.s attach them selves to hospitals in many ways. An Attending should mean that he is someone's else service and shares that person's privileges.

I have only been communicating via mail and voice messages mail - and a request to contact Sylvia Lai. So and as he also said just get here.

As CHC is so flaky, I did contact Dr. Hedy Fry who has similar privileges as CHC and more as she can TELL THEM to do it It seems that the CHC does not initiate action except maybe to harm me - as their behavior is very suspect at this time and considering the real urgency and the consequences to me - I am really getting worse - I experience - massive shuddering - and spasms out of no where - that feel like a spring in my body went uncoiled - and body spasms - almost leaving the bed. On top of the severe blistering - which I have calmed down so this time it was only 2 weeks. the time before that 45 days.and before that 1 month. The Heart disease that had me and continue to experience chest pains - numbness - light headed - nausea - tingling - a brain bleed - and what the hell is that in my feet - I feel like i am walking on wet cardboard - lumpy - and at times no sensation.

With everything that I now know of Malaysia - its a very dangerous place and people have to be warned. The Malays are deliberate hostile to visitors - I did not just get infected - it was placed in my bed to INFECT me. Then the amount of assaults and the lying is extraordinary. About everything. The medical care was denied so that I will die. That is ruthless and to go around and tracking this down. As you can see I over communicate. But that came from necessity - I was ignored - discriminated and infected with a dangerous disease.

I have to file more reports - Police- Human Rights - etc.

I am still trying to find medicine. It is way beyond broad range antibiotics - But I have no choice - I never did. You cannot prevent criminal actions to you especially as the criminals are now the doctors.

I am going to try TCM as all this antibiotic use damages as well - Still trying Thailand called and emailed - and they have a far superior medical facility but it will be very expensive. If I can tolerate Chelation I will be better ASAP - 1 treatment and at least I will not collapse after a few weeks. Leptospirosis or Weil disease as many Collapses are attached to it.

- **Hantavirus Pulmonary Syndrome expanded.**
- **Hemorrhagic Fever with Renal Syndrome collapsed.**

- **Lassa Fever collapsed.**
- **Leptospirosis collapsed.(MALAYSIA EPIDEMIC)**
- **Lymphocytic Chorio-meningitis (LCM) collapsed.**
- **Omsk Hemorrhagic Fever collapsed.**
- **Plague collapsed.**
- **Rat-Bite Fever collapsed.**

To: hedy.fry@parl.gc.ca

Dear Dr. Fry, As this illness is so severe and life threatening - my writings come from a place of sincerity and no filter. It may be too raw for others and should be confidential to you. I cannot experience any more hardship or torture.

And its unknown if I can get any assistance at all. But at the same time I cant be penalized for this disaster.

Regardless if their a bizarre rationale - a syndrome etc - living it - experiencing it - is very painful. I divulged all too you- simply has it operated in the darkness of life. **People as you see - did willfully and with full knowledge of their actions choose to harm me. For reasons i cant accept - but apparently they exist. When I write all of this - its an out of body experience I am writing about myself - but I distance myself from the reality - as its so dark.**

So - I have limited time to travel - I have to move from this condo - as the death threats are too real and other innocents can get hurt Though the management has said - if Goh comes here - they will take him out., And by that I mean they may kill him as they see him as a danger to my life and the life of others - here. This is a lot of crap to deal with.

So as sick as i am - today is bad - so far - palsy has returned - all these were Toronto given experiences. And though I tried to get help in TO - there was none. Same in Malaysia. The same in Vancouver -

The only place I got better in was Seoul and Osaka. There medical systems are state of the art.

If you end up advocating my care - with St.pauls you know that the Dr's are not quite prepared for such a hybrid condition. ? And what this body will do?

Plus i can't take a 15 hour plane ride which translates as 24 hours - There will be no rest leading up to the departure - no rest on the flight - very high anxiety - a bad heart that went bad - upon the infection. With open lesions -- expressing body fluids - Pus - etc. So Nasty.

So its daunting. I have to find another hospital somewhere here - and go get more meds - which are not the meds to take as possibly the persistence is due to the virus mutating as the drugs were not prescribed in time and also are not the drugs for this. Well there is history - but treatment protocols are ?

- <https://www.ncbi.nlm.nih.gov/pubmed/19996235>

Based on this background, we have devised the working hypothesis that most cases of schizophrenia are caused by infections and other environmental events occurring in genetically susceptible individuals (Torrey and Yolken, 2000).

DISCUSSION but the patient died...

Leptospirosis is a zoonotic disease that occurs worldwide but with a higher prevalence in tropical areas in both developed and developing countries.¹ It occurs both in rural and urban settings. Clinical manifestations range from asymptomatic seroconversion to acute undifferentiated fever to severe presentations with jaundice, renal failure, and pulmonary hemorrhage. To our knowledge, this is the sixth reported case of leptospirosis in patients with HIV infection and the second in the English language literature.⁴⁻⁷ Although this patient had no AIDS-defining conditions before his first fever clinic visit, his advanced presentation at subsequent hospital admission and his rapidly progressive and ultimately fatal course make it almost certain that he had AIDS at the time of his acute episode of leptospirosis.

This case is particularly notable because previously reported patients with acute leptospirosis and HIV coinfection had severe clinical courses. Clinical manifestations differed between patients, variably including meningitis, renal insufficiency, acute respiratory distress syndrome, and hypotension as main manifestations.⁴⁻⁷ All patients recovered fully from leptospirosis, except one who had residual renal insufficiency. In contrast, the patient reported here experienced a clinical course of leptospirosis consistent with the more common presentation of acute self-resolving undifferentiated fever. Many believe that humoral immunity, primarily against leptospiral lipopolysaccharide (LPS), mediates recovery from acute leptospirosis and protects

against reinfection.⁸ As a T-independent antigen, leptospiral LPS would be predicted to induce antibodies in the absence of CD4+ T cell help,⁹ explaining the high MAT titer during acute infection despite likely advanced HIV-driven immunodeficiency. The high MAT titer cannot be dismissed as HIV-related B cell polyclonal proliferation with hypergammaglobulinemia, as an etiologic diagnosis (real-time PCR) definitely demonstrated infection. The patient recovered from acute leptospirosis without antibiotic treatment, without acute complications or sequelae, and without requiring hospitalization. Acute leptospirosis was retrospectively confirmed by a molecular diagnostic technique conducted on-site in the Peruvian Amazon, which has been demonstrated to be very sensitive and specific, detecting pathogenic *Leptospira* to ~10 organisms per specimen without cross-detecting other pathogens or non-pathogenic *Leptospira*.³

We conclude that acute leptospirosis in HIV coinfection is not inevitably severe and that there is probably wide variation in clinical manifestations similar to what occurs in immuno-competent hosts. Clinical presentations and complications likely depend on a combination of virulence potential differences that vary between pathogenic

Leptospira and host genetics of non-T-cell-dependent innate immune responses. A prospective cohort study in an HIV and leptospirosis dually endemic area would be necessary to establish definitively whether HIV infection alters the course of leptospiral infection, either acutely or in chronic infection, as it does for *Treponema pallidum*, the agent of another spirochetal disease, syphilis, which lacks the T-independent LPS antigen.¹⁰

Subject: Thank you

To: hedy.fry@parl.gc.ca

Dear Hedy, I hope I may have answered any questions that you may have asked. I am proactive and as the situation is / alarming - what I can do today is write and communicate - and if this disease progress and hits the brain etc. I may one day be unable to do so When the poxing starts it causes my joints to swell and it seems create gangia? So it starts to hurt.

But I hope and I pray that you kept everything CONFIDENTIAL and PRIVATE - I bared my soul to you. In trust. As I invaded my own privacy and over shared but times are bleak. if you have betrayed this trust and I get into greater situations - my death from this disease is guaranteed.

I only say be cautious as all of this is in hindsight and I had to live through al lot and it was done behind my back None of my family - ever openly discussed the situation. It was after the fact and years of betrayal that I discovered al that I reported to you. As the CHC did to my mind do a dangerous thing.

I had to find someone I could openly talk or write to. And as you will understand that yes in Trinidad these things do happen. I have only 1 life and its a mess.

Vancouver ? yikes my only recent memory off Vancouver was a quick visit to my beloved city in October 2008. A client in Seoul had a family member have a nervous breakdown that had him flying to Hong Kong and then to Vancouver. He required that I go to Vancouver for the weekend - and see if i can help but to also bring him back.

So I agreed - but when I landed in Vancouver - I was badly abused by - the airport staff - taken into a room full of people all immigrants ? I am a Canadian citizen and so I asked what is going on ? I was told to SHUT UP!

Then after waiting in line - for 2 hours after a long trip - they came at me - Why are you here in Vancouver? You are here for a weekend who does that?

Then they look at my passport - so you are canadian- why did you not say so? I was told to shut up. I asked what is this al about? Wellll you are here fo a weekend - from Seoul - who does that? And you bought only carry on luggage - who does that? They searched my luggage and then asked why did I have 4 shirts - pants etc.? Why do you need so much clothes for the weekend?

They searched ore and said oh you have Pills? I had some vitamins and 2 Valium. Well what else do you have MDA? or something like that.

I had no clue what they were talking about.. They threatened - we are going to test the PILLS - and you better confess - I looked at these people as if they were insane. I shrugged at this time and said test away as I do not understand what you are doing?

Some random dude in line - says to me in Spanish - OMG You look exactly like my uncle - .. and I replied I get that a lot. in Spanish

Te pareces exactamente a mi tío ... y le respondí que lo conseguí mucho. en español

I was told SHUT UP -

So after 4 hours of BS - they said enjoy your trip. I was shaking - exhausted and livid as what was that?

Apparently i was profiled ? So if Vancouver is now this racist? and ignorant. When I got to the car rental agency - told them of the nightmare - They say you were lucky you did not get tasered.

I cant imagine this mentality ?

I did come from an affluent family - and I traveled a lot - especially in Asia - I have visited so many countries - due to work and the fact it was so cheap ... or the real cost -

as Vancouver is severally over priced. And for these bizarre customs people to invent stories - to CYA - for detaining a Canadian on a weekend trip to Canada via Seoul .. I have had nightmares recently after sharing with you - this tortured life- and this nightmare experience.

My plan after I was infected with this - and not knowing what it was- I contacted Lawson and then I contacted travel arrangements to Vancouver from Bangkok or Chiang mai. Its only 686. Canadian return to Canada from Bangkok.

So buying a cheap return fare - i could have budgeted for- seen Lawson and saint paul's - I was looking at student housing at UBC as you can stay there - for a cheap price and then after Lawson and i had worked out from the Blood tests and then I was thinking where in Ontario could I live that I dont get sick - maybe Port Hope - etc .. somewhere clean-

When I flew out from Toronto I took Korean air as it has no baggage limitations - per se - or as the agent says the most generous - 2 bags any size any weight. being that I was only planning to rest and get better - and stay home and write - I brought my computer stuff - clothing - for any occasion. I have to bring back the same - but Malaysia?

In the past when I traveled I met great people - and suddenly I was at functions etc. Some of that did happen --I was taken to meet dignitaries and attend functions. As the token Canadian.

again as I had nightmares due to my writing you - my over zealous need to be safe - not get murdered - etc. I have never encountered this magnitude of the bizarre all at once. That lasted for many months.

Its as if what ever could go wrong went wrong and worse -

If and when I get to Vancouver I have a difficult life - with the heart damaged - this nasty infection and as if the 1 last trip to Vancouver was an indication -

So if Canada takes my very personal and ridiculous life events - and plans to hurt me - I cant recover - ever- I am a horrible patient - I wanted to run swim - do something - not lie in bed with tubes - as I did in Seoul - when they said 3 months bed rest and tube fed - and as the nurses could not find my veins easily due to my body hair - and fat.. well - I threw a tantrum after 3 weeks of being starved - and made black and blue - and they sent me home - and it was a shock as I had not eaten in 3 weeks - or walked - that going to get food - usually a 10 minute walk - h a- i could not walk - I had to stop every few feet - lean against a pole and then do that.

- *Last night I went to the grocery - 5 blocks away. 6 bags - and I could not walk back - It took over an hour - I had to walk stop - carry some and relay the groceries - for 5 blocks*

I am that weak - and for sure I am dying - that i know now. so if you have done anything that has compromised my life further - undo it - as Canada may not be safe for me either -

I only confided in you as I had hoped you would understand better that your Canadian cohorts like the infamous Marc-oliver Jean - laughing at my predicament and then playing games - ?

I am honest in retrospect due to the massive dishonesty played on me - But the world is a cruel place now it seems.

I am going to find a hospital - and that will take hours - and see if i can get ? or maybe just meditate all this away. I do trust you - but you cant trust others with my life info.

Thanks Cristoph

Also - I am losing my memory - one of reasons I am writing is that the disease shuts you down -the sepsis - also if I am not rational at times -understand its a deadly disease - if not treated and I am in such deep shock - it attacks every major organ fast.

The disease in Red are the ones I am infected? With.

- Hantavirus Pulmonary Syndrome expanded.
- Hemorrhagic Fever with Renal Syndrome collapsed. The fact that I am hemorrhaging already
- Lassa fever collapsed.

- **Leptospirosis collapsed.(MALAYSIA EPIDEMIC)**
- **Lymphocytic Chorio-meningitis (LCM) collapsed. Sepsis / Meningitis**
- **Omsk Hemorrhagic Fever collapsed.**
- **Plague collapsed.**
- **Rat-Bite Fever collapsed**

So I apologize in case - facing certain death does cause intense panic. I just wish I had someone to discuss all this with.

Subject: Re: this is an update - it just get worse and worse

To: "Grierson, Brynn [PH]" <BGrierson@providencehealth.bc.ca>, hedy.fry@parl.gc.ca, David Brule <dbriverdalehomeopathy@gmail.com>, Ourem Castle Information Centre Protocol Partners <ouremcastleinfocentre@gmail.com>

I am only looping you in. Not asking - as these circumstances are way out of Control. I had contacted CHC in KL in May and they requested I get all arrangements firmed up and set and have your care providers - allow us access to them to discuss the situation. So that meant I had to contact you and keep you informed.

I thought you were aware of this. If there are delays its not due to me - CHC said - that they can organize a flight but ? As the illness is debilitating and escalating - There is a short moment of time to fly out - in between the heavy poxing - the powerful surges of infection that have at times blinded me - affect my memory (hence all the Writing) and causes me to choke - gasp and stop breathing - all when I am sleeping.

This has made delayed as it took 3 weeks to clear my symptoms away. The fact that i could start choking on a flight from a sudden discharge of strange mucus that surges - and chokes my airway -? This had happenned a few times over the past month - in May and then disappeared and then resurfaced suddenly this week - Usually it was milder and could be cleared - but the responses that have returned were far greater. Involving me running to the bathroom - gasping for air - and trying to spit up this gelatinous clear mucus?

If I am on a 15 hour flight and this happens - Disaster - if i cant get out of the seat in time - make it through the aisles to a bathroom that is open.. If people see this reaction - gasping for air - spitting up - retching - if i dont breathe - then its a heart attack - unless all this is a precursor to a heart attack? Way too dramatic - so I am fighting for my life in many ways. All this from these Malays whose only purpose it seems is to kill me ?

As Malaysia, its doctors, hospitals, Kliniks confirmed that they refused to treat me - denied access to doctors and to medicine - in writing and in Person confirmed yes we usually prefer NOT to treat visitors to the country especially when they have contracted in your case - Leptospirosis. We dont want the paper work or the issue as this is an issue that is usually fatal.. and the guy says - Understandably we have to be careful - so we deny you.

Its a 15 hour flight back - and I have to be strong enough for that. Alternatively - I am trying to get to Thailand - 1 hour by air - or 8 -12 hours by Bus. Get some treatment as Malaysia none - and I contacted Dr. Hedy Fry office for advice over a continually escalation of this situation and how to work out logistics that keep harming me -

The infection is not waiting for treatment -which it never received and its getting worse..

Or alternatively Dumai - Indonesia is only a 3 hour ferry ride - Im sure I can get a hospital there to stabilize me - i need IV of Antibiotics and hopefully - after that get a flight back. But I have not really been out of the apartment in about 3 weeks. Its way cheaper there - but who knows the medical standards?

If I do not update you - it will be misunderstood - if I update you its misunderstood. you see if i can get to Van - and this condition is much worse - I am hoping at least there is a record - and if I am in a state that does not allow me to communicate - and since it has affected my memory - ? This is my only and last resort. So please do not delete any of this - as i have no idea - what to expect.

I have gotten worse over the weeks - Bad meds - no sleep - neurological impairments - organ damage. So I am back on the TCM - which has bought some release from the drama but its only the past 24 hours - i just could not find anyone here - as the language is an issue.

Note that - the writings is bold so I can read it - eyesight is poor.

Hello,

I am so sorry for the circumstances you find yourself in, but I am unable to provide you with any assistance. It would appear that you are trying to find a way to return to Canada, and that is not something I can help you with. As I have advised previously, if you are able to travel to Vancouver at some time in the future we would be able to offer you services in one of our programs.

Subject: Dear Dr. Hedy Fry & Dr.Lawson Baird & Brynn at St.Paul's
To: hedy.fry@parl.gc.ca, "Grierson, Brynn [PH]" <BGrierson@providencehealth.bc.ca>
Cc: David Brule <dbriverdalehomeopathy@gmail.com>

**Dear Dr. Hedy Fry & Dr.Lawson Baird & Brynn at St.Paul's
REALLY SCARED AND WORRIED –**

<https://youtu.be/GAJrN7uBrlc>

From the video – you will see that the poxing returned and is much worse than before. Its horrific – and it also means a delay again in getting out. These poxes are painful in their itch- and make me sore, very sensitive to light and sound and touch. I live in the shower again – As it brings on fevers – and there is no way Jose- I can get on a plane – with these- as they will bleed and pus – and if it spreads to my face OMG – I don't think its contagious but it's a sign that the Disease is accelerating – It took 45 days the 2nd time to clear it. Its due to the fact that they will not give me medication or ? Remember they admitted that they Lied, That the Mised me and the CHC and they did as I was a foreigner. So

discrimination that could lead or will lead to my death. That can be classified as Murder

So Goh planted the bedding and the Medical System here in Port Dickson guaranteed that it will be fatal.

Now the CHC in Malaysia – way to disgusting an organization. I am sure by now they are trying to discredit me in any way possible. I will as my situation is so dire classify the as dangerous people. You as in I do not turn to your Government and as you see I am a verbose – only as I was and have been, IGNORED- DENIED – RIDICULED – that will lead to my death.

But as that – whoever he says he is – Marc-Oliver Jean - ? The fact that I am broadcasting this everywhere may work to Save me – as the Malaysians will not harm me as much? I have tons of documents and I will be contacting the Chief of Police – here in Malaysia AGAIN – I will contact the Malaysian ambassador to Canada – I have contacted the WHO – HUMAN RIGHTS and the UN. And whatever news organization I can get to. The Malaysian – may has they have done in the past just waive me through as they agreed – there was a lot of misunderstandings on their part. They did mess up my Visa before so I got to know them. Plus in all my travels many times these clerks – make mistakes – and it gets sorted out. If GOH has made false reports – I hope that my factual ones – I have all his legal documents – he has nothing - and my name is nowhere on them. So it was a fatal meeting with an insane man, who just targets me over and over and over. I have to sue him somehow as the \$ - financial issue I have and the deadly illness is due to him and him alone.

Its not a complaint about Canada – but about the Dangers of Malaysia – The Leptospirosis – the incredibly violent people here and the Danger of the Medical System that treats foreigners the way I was treated.

I do have concerns as it was the dr'sin Vancouver who waited until I was dying to assist they told me that – after the fact. And it cost \$45,000.00 to repair that damage that led to more medical drama.

I understand that I am at great risk – as the injuries from Childhood were fatal. That the treponema disease that is now established in 3 generations and in cousins who live in Montreal and my kids and my grandchild. Elliot Millner. That I came to Malaysia to clear my blood to get rid of the prescription drug toxicity and to prove which I did that Toronto was a contributing factor to the allergies and anaphylaxis. I did see allergy specialist who agreed that I did have an allergy to Toronto. Not a joke – he said it's a real thing now.

I also had blogged and discussed how to create a wild virus free of drugs that may be easier to treat, so at no time was I at risk. But Goh Malaysia – Lepto had

other plans, As Lawson played a major role in establishing the syndrome – or getting it identified .

I know that Vancouver will be challenged by this infection – as who in Vancouver has Leptospirosis. Again I will be written up in Medical journals, as I was before. I was told by the Vancouver General doctor that I was the first and only Live case – its all in med texts.

The only thing I am pissed off at CHC – is the underhand way of treating me and the lies they told me – which as you see – has determined my fate. Diplomats are not Dr. and if MCJ went to play ?? whatever he did – he created double jeopardy. I think that under tort law he is liable – If I die or become so disabled – you can try diplomatic immunity but It does not apply. He is Canadian, an official providing information or lack of action to undermine my physical life, another Canadian. So I can never speak or engage in further CHC communication. Again its proven too dangerous, as is Malaysia.

Now back to the damage – there is neurological damage occurring. The blindness – which seems to be okay but as I am sedated - ? The auditory hallucinations – I hear music all the time – and today realised there was no music from anywhere in my place or building – so the damage is occurring – I did see very strange light effects in my head – flashes of green- copper – and a lot of black.

In fact I see no light in me. Usually I am very light – see clear or golden tones but seeing black – I think of the GRIM reaper. Leptospirosis causes schizophrenia. With congenital Syphilis - ? And a father who was hospitalised many times in Trinidad – to Mount Saint Anne’s mental institution. From the age of 21. But he was full blown VDRL syphilis - Jacky, the mother .. was also diagnosed with Schizophrenia ? The ? Reason was that she told me – and wanted to know if I thought she was crazy? I did try and discuss this with her years later – and she was shocked that I remembered it and shocked as I could describe really weird stuff she was doing? And certainly her Violence and her now legendary sexual affairs to pay her bills – and she would go into a fury and beat me to death. Many times people had to pull her off me. So As that was proven 20 years ago – I have not spoken to her and as result my sisters disowned me as well. Trinidad family Bacchanal – it also explains why my attempts to reconnect to child hood friends failed.

But her sister Charmaine (RCMP now) go figure - did try and kill their mother and ended up inheriting the family fortune, cutting everyone out. So there is enough wacky shite in that family. And the same thing happened to the Camacho fortune – stolen away by cousins. So trust me no family and even my own daughters? Were nutty – beautiful but nuts. From their mother as well. So I had

to grieve many losses – with that illness – in Toronto. Now this melodrama. And I did find direct link with con-genital syphilis – Treponema diseases and these afflictions that are a syndrome. So Talk to Lawson – I think my files are gone but as it was so intense he may remember and why has he not called me or emailed me? But Lawson and I are the same age but he now has very young kids who may fill up his mind.

So no family – no friends - \$ stolen by the virtue of Malaysia – the illness – the lies – the deception – etc . And no Canada. I am going to try and get more meds from ? And as I am too straight forward I have to think of ways to get them? and from who – and that means travelling to Melaka 80 klicks from here.

So what did I do – I studied – I travelled – I read – I prayed – I was honored in the Vatican and in Fatima. Some of my clothing – and object D'art are in Fatima Portugal. When you have experienced this weird life and did everything to overpower the family genes or karma. You can talk to Dr. Lawson about it and Dr. Carlos Evaristo in Ourem Portugal who has my collection. And if Il Papa Pope John Paul were alive you could have talked to him, they knew all the details – but that is my faith. I do pray in Sanskrit, Latin and English. Also you can talk to Dr David Brule. I hope the CHC and that MOJ have not harmed me in any way? As I was warned if you contact the CHC – they can harm you more and that came from Cdn in Seoul Korea.

So I have no idea what to do? Too weak – I am looking to go to Maleka – and escape the wrath of Goh. Spend time in deeper mediation and maybe prepare for death. As this can kill me at any time due to all the bad events and people I met including the CHC . I link the evil of Goh and Malaysia with them. I see them as evil now. And only you Dr. Hedy Fry will know. It was in my 20's that Jacky mentioned you in a conversation with Odette Gomes now Price. So not sure if you actually knew each other or where just aware of each other through the virtue of San Fernando. Grandpa Gomes had a Rum shop and grain and livestock at the corner of Coffee and High streets.

Grandpa Camacho was Camacho Brothers and the Consulate General of Portugal (Madeira) at Maxwell Philip Street in Port of Spain.

I only mention this as I have traveled so much and met people who on a small boat in the Mediterranean going to Porto Santo from Madeira - had been to t'dad to my home and described such details – so the world is small – I think you know Auntie Odette's Ferreira friends – Dr. Bisoodath and VS Naipaul and Sati Naipaul – oh crap she died – in 1984 . I see Asram is in San Fernando – but there was a connection to Valsayn.

Anyway I can talk about this now and never again. Its only as the Cdn govt is so nosy and want to think I did something wrong to end up like this? But chile, as you know, I was only born and the rest is the shite that Trinidad gave me to deal with. So I travelled the world to forget it all. And I never eat casareep so I kant go back.

I wanted to go back to Europe – Portugal but I was registered in Trinidad and by the time I wanted to escape Trinidad – and get to a bigger pond – Grandpa Camacho had died and all of my birth records are gone. Also with that Family history I wanted to become a priest. Religion prays a huge part in my life. So that is very un-Canadian of me. I went to 2 churches in Toronto and if you look at my picture Im vaguely Arabic looking – when I lived in Kuwait and Oman- I could see that maybe the Arabs were in Portugal. So I went to the Catholic Church and was told the Mosque was down the road. I went to get the sacraments at another church – the priest on the phone was welcoming – but the minute he saw he recoiled in fear. And said stay there. He talked to me after we prayed – he wanted to see if I was really catholic- as the church was vandalized by Muslims – so Canada is a land of Fear – Bigotry and racism.

The world is an awful place now – with all this rampant violence – attacks for no reason. And Trump! As a writer for fun – after a mediation – I saw clearly that Justin was Prime Minister and that fool was President. I thought it was a dream- but NO – This will not end well as part of the mediation that had trump in power was that the world went into a war – and darn that’s been mentioned. What has happened to our lives? Mine destroyed by forces so profoundly evil that I am given really deadly diseases in ways that baffle the mind – I am truly scared – very afraid of what will happen to me. I can’t have Vancouver turn against me as well. I will shatter. Can you imagine I am writing you – after all this time – and I have to discuss all my private and pain filled years? I just want – Peace – and Happiness – OMG

And some of these people around you so bobote that they will make mah head spin. So maybe we will meet in Vancouver? I heard it’s so expensive now. Geezan ages.

Blessings

Cristoph De Caermichael

The Camacho name I ditched – after my mouth was destroyed but we had Scots blood – Barbara Finley married Herman Rodriguez who had my father – the last of 5 kids in 1935 –Granny Babs died of Syphilis. Crap and Herman had many kids – with other women – Trinidad style – The Finley clan. Became Farqeson The clan traces descent from Sir John de Carmichael of Meadow flat. So we have Red heads - freckle – blond blue eyes etc – a real melange – I was quite fair –

blonde – and a red beard – ish now I am blonde again – and as Daddy was Rodriguez Camacho – and Gomes and we had this scots blood line.

I figured after all the crap – go back to an ancestor far removed – and Caermichael Is the rock of my beloved saint Michael. So voila get rid of the past until it caught up so spectacularly through a wtf disease and someone trying to kill you? Really – that's pure nutz.

<http://www.motherbedford.com/ScottishClans.htm>

No wonder I have to write everything down – as to keep all this in – I just want to be well again and safe – though Canada is not that safe anymore and the murder rate is high – if I remember and due to poverty and illness – I may be placed in more danger. Crap.

It's been a fairly traumatic and tragic life – but I don't want to die by being murdered – or infected by a mad man-

Okay – I can't talk about this anymore –

Thanks

Cristoph De Caermichael

My X-daughters Lauren and Allana - ? And Elliot and Alana's husband I don't know them or see them - i had all this from the internet - i love them greatly and all these dreams which turned into this reality that you see. Why I am not in touch? In Seoul Korea - I sent them \$ - Trips - clothing - shoes - bags etc. - called them every day.. to be told finally - Dad - Granny says we can't know you anymore ? Confused I am saying what - how - well - she will not give us our inheritance if we stay in touch and you are too sick and poor

I am so bewildered - by all this - Alana - I am sick yes and poor from not working as I am sick - what do you mean? Dad, I love you - I don't want to hurt you - I said is that why Lauren will not talk to me - yes - we were banned from ever knowing you again. And that was that.

So patterns upon patterns - I have lost 10 million \$ from my family - My kids and my life - Go figure -

So I pray - and I try to survive. I remember I wrote Oprah years ago - and she wrote back - Sorry we don't publish fiction? This is all real and to others its fiction.

But I have kidded before - wtf - does something or someone want to kill me - enough already.

Subject: Sorry to barge in like that - VERY PERSONAL & CONFIDENTIAL

To: hedy.fry@parl.gc.ca

This is for the eyes of Dr.Hedy Fry only - its way to VERY PERSONAL & CONFIDENTIAL for anyone else

BTW I only tell you all this - as its what i was told - experienced etc. And as death is on the table - I have no idea what will reach you ? to assist me?

As you can see I am in a very dangerous situation. Not of my doing - I could never have predicted or known about Leptospirosis or that the Malaysians are all pretty dangerous filthy people. From August last year i had to document - report to many different agencies incredible acts of willful damage to the condo I was staying in- all approved by the property management. There was nothing but conflict with the banks stealing your \$, Bus tickets being changed as there saw a foreign name and changed the time in the computer - leaving you a a bogus ticket - etc.

So I was glad to be leaving Malaysia - I had succeeded in my venture that had proven that Toronto's polluted environment had compromised my health and caused many bizarre illnesses.

When I landed in Toronto from Oman - it was meant to be a brief stay and back to Vancouver - but I started getting sick immediately - the collapses - the comas's etc. the vomiting - the swelling of the optic nerve so I had double vision. . The tumors - all very bizarre - I did go into the hospital the first couple of times - as i was scared by all this. But the Toronto hospitals were so crazy - dangerous - wild places. I was placed on a gurney in a hallway - and witnessed - hospital guards attack a bed ridden man who was hysterical - they got into his bed and kneed him - with their legs until he stopped . Toronto is way too brutal.

They then Placed me in a ward - of drug addicts as they said I had to dry out? I asked from what - as I had collapsed at the side of the road - they had to verify I had no drugs in me - I have never done any street drugs - ever - I last had MJ in Trinidad at 16, 1974 ish and after 1 month - when I could not remember my name - I said that's it. I cant do that crap.And al the tests have no drugs - but that is Toronto. Yuck!

I do not smoke and dont drink much as in a glass of wine every 6 months or vodka once a year . Daddy was a severe alcoholic so I never touched it. We were / are the Camacho family - but what I discovered later in life - I removed myself from them. It was not so much discovery but the incredible heart break of a dysfunctional family that had hurt you so much that it was fatal. It was my introduction into Treponema disease and congenital syphilis.

I am or was related to the whose who of Trinidad- The Ferrerias, The Gomes, Camacho , Reids, De montbrun - Barcant - De souza - De Freitas - Rodriguez - da silva etc - Perreias -Price - you name it we - the jardims, the jardines. etc bla bla

Christmas was always fun - we had 200 people over as I lived in Bayshore - near Good wood park, near the kirpalanis - moses - maraj anyway that was then. My mothers revenge on me - was to discredit me - with all my family. She was having an affair with Uncle Max ferreria - her brother in law - and his wonderful wife - befriended me to find out - what i knew - which was a lot - and as i saw my aunt break down - and cry with so much pain - from all this deception - i told her what i knew- i was 19.

I had no idea that all this was going to haunt me for the rest of my life and destroy all my family. Hell hath no fury etc. So when I tell people I have no family I have none - and the injury to my head and jaw - that was deemed fatal by Canadian doctors - was from Jacky - somehow she felt that she had to crucify me. I have told everyone else it was a car crash. I have since attributed her madness to a treponema disease and probably VDRL syphilis - If you think this is bizarre - In seoul - in 2004 - I was walking in Myengdong - a place full of people - when suddenly - a Korean Buddhist priest came up to me and a friend and told my friend in Korean about the great danger I was in from my mother. And that she had done something so bad - that it could kill me.

Again if you doubt me - talk to Lawson as I told him a lot of this kind of stuff. But the reality was that in 1998 - a stranger came to me on the street a young woman - and said - I see what you are going through - I need to send you to the Vatican - I said Portugal as Pope John Paul as he was about to go to Fatima for the beatification of Jacinta and Francisco - so she went to the bank took out - \$3500.00 and i went - Lawson wrote in my medical log - Its seems Cristoph's s illusions pay him cash.

You have to meet Lawson - he is really wonderful - I miss him. I called every year from Toronto sayig I coming - I have to get out if here - but some new calamity would hit. I fled Toronto to save my life - and now OMG Malaysia. Like I said to Dr, David Brule - something or someone really wants me dead.

<https://youtu.be/6oAOcZFYdA0>

Lawson was not big on spirituality or the catholic church. But he said in case what you have is catching - go and hide your catholic medals in my office where i cant find them. And if this miracle thing is real ?

Yes the trauma I experienced catapulted me into a world of lifelong prayer and devotion. To the point that i was flown to Fatima - met the Pope and was allowed to be in the presence of Sister Lucia . The cloistered carmelite nuns I met - and they knew me - praying for my life for 2 years - They were allowed to be free due to the beatification. They freaked me out as there these tiny women about 4'11 speaking in these childish voices as they had been cloistered from the age of 9. And 1 looked at me - and says - you are closer to God that all of us. I said thanks - as that meant i had in deed died -

I moved to Canada in 1980 - went to school -- to university - in Saskatchewan etc - Pre Med - never got far - I just collapsed at 21. Turns out the beginning of my life long battle with a non diagnosed condition that was discovered in 1993 in Vancouver. Congenital syphilis - By the way my family friends the Boland's- suffered the sudden death of their youngest - healthiest child due to Treponema - 1 minute he was alive and the next dead - a massive coronary. You might have known Dr.Ralph Boland. my uncle is Dr, Vity Gomes. I went back to school later and did much in Seoul I was there for about 10 years. I am 59 now. BTW - according to that dr. Death by 60 - You really have to talk to Dr,Lawson Baird. I forbid Marc Oliver jean and the CHC - from ever contacting me as - suffice to say there is something seriously wrong with them. *As AuntYOdette will say but Boy what wrong with them - they fell on their head or what?*

There was a massive outbreak in Moruga in 2010 and I was asked to talk to the school about treponema disease. It was deemed " Demon attack" In Vancouver in 1998 - when the septicemia made me vomit - for hours - i did experience glossolalia - but it was attributed to a brain infection., So I had real knowledge to discuss these events - But Tdad preferred the demon story. Why do I tell you all this - because my life ihangs in the balance - If I dont get help - Im a dead man in 60 days - its been 6 months and if you have seen what I have seen and experienced in this body - ? Well - its all about death.

- Not much else was told me about what that meant - except take medicines get Bicyllin and that was that. But it was not. I went on to have several bouts of an unknown illness every 7 to 10 years. in 1998 I almost died due to severe septicemia from rotting bone and teeth. I had started going to the dentists as my teeth were breaking - just shattering in my jaw- the Vancouver dentists discovered i had several fistulas and that my jaw was rotting - and decided as I could not afford the hefty 5000.00 to repair it - and they told me after my 2nd near death they DECIDED - to not help and let my life worsen. A segue to this current event. THE CHC & the Malaysian doctors decided my fate - Let him die.

It was when I was in Korea- teaching that I collapsed. This happens with no warning - Sudden onset. It was again conformed congenital syphilis but I was treated with everything - the implants to my jaw -45,000.00 came from my rich Korean roommate. So my life was saved until the cow bone implanted into my jaw loaded with treponema created the massive illnesses.

The Trinidad History of treponema has demon attacks- maybe you heard of it - but i was called to offer an explanation, But you trinis they love their drama.

- <http://www.guardian.co.tt/news/2011/10/30/claims-demons-shut-down-moruga-school-again>

BTW - I did discuss this with a neurologist, who was also a ex- Jesuit priest I met in a Seoul party - this aspect of Brain infections - Glossolalia - demons etc. He did say there was a correlation to the medulla oblongata - the mouth to god and its understood that archetypes of God - angels - demons - are attributed to be created with in that region of the brain? And certainly some infections can cause these events to occur - in precisely the manner that was describe in Moruga.

The severity of the Vancouver doctors and their stated desire not to treat me - until I was near death. I have spent years particularly in Toronto where any dentists that saw me - asked if i was a Meth addict - I was and am so shocked - and I have to fight depression - every-time. 1 as its a reminder of jacky - 2- that Toronto is so dangerous with drugs - that doctors with no couth - no decency will bluntly insult you with you must be an addict. I hate drugs - and I hate addicts - which makes me in Toronto - a target - as quiet as I am - the Drug addicts are so ubiquitous.

The anaphylaxis caused my veins etc to shrink.. In Seoul I was a body builder and that body has disappeared due to all these illnesses.

THE CHC in KL has hurt me badly - denying any help and I am sure after you talk with them - you will hear all kinds of crap. They do have discretion and as this is so dangerous - it was decided to do nothing. Plus as I am so bold faced - telling that man exactly what he did to me - he will hate me - but then again what he is going to do kill me ? Goh already did that.

VERY PERSONAL & CONFIDENTIAL - ONLY AS YOU ARE A DOCTOR!

The Leptospirosis has mutated with HIV and is now a deadly killer - at the time of the bone infection in Seoul I suddenly tested positive. for HIV - Meningitis - TB and EB- I was devastated. Hiv was supposed to be from sex - and sure there was a lot of sex. Sorry but the Koreans are wild - and yes it was unprotected - and multiple partners - on the orgy side of life many females - many guys -not guy on guy but well the girls had multiple partners, at the same time . But I never tested + as well as there was a 2 year period of celibacy - I was too catholic for Korea - and abstained - I have previously been celibate for 9 years - after my bad marriage - and since that at the time false + - I was again and to this day - celibate.

But it came as a blow and reinserted the earlier diagnosis of a 90% of becoming +. But with chelation it all went away. Subsequent tests - had me clean - until the hell that was toronto. I could not get chelation - and i went to get tested- I discuss it all openly as you see. And they said you are + . I said no way - and over time the + acted really weird - the drugs were a disaster - ad i had every reaction that was listed. They changed it -

and the same - but i went on Traditional Chinese meds - and off the drugs - I told the doctor who was so alarmed but not that I was off the drugs bit the fact that my body was doing something unseen before - the other factors were so elevated - that my body was fighting the disease in a manner not seen. Of course they wanted back on the drugs and I said no - as I was so anaphylactic - and reactionary - and as they said the herbs were doing incredible things - ? However the anaphylaxis got worse and worse - until i was a shut in - ish - so as they kept saying what drugs are you taking - again street drugs - I never have - but they would not believe me - so I said test me for the drugs you gave me - and I was all allergic -

Dr. Hedy you cannot divulge this - as its so private - people in Canada are so strange - I was going to a clinic in Thailand as they state that this infection now is as common as malaria. And with my Unicorn Blood - I wanted to get their perspective and talk to Dr. Lawson Baird on it.

The drugs etc and the hiv was such a mess - yet I was very healthy as you can see from the previous drug tests - the elevated sugar levels was due to the shut in status - Toronto a mess - I have met doctors worldwide now and they say Toronto is 25 years behind all treatments with HIV - ? All I knew was that prior to January 13 2017 i was fine - healthy running the beach - and after that - dead - unable to move etc. Fevers - a blur - I only remember February - a bit if March - April and May. So if the cHC will not help ? What can I do - I did try fundraising but nothing.

The endemic treponematoses include yaws (*Treponema pallidum* subsp *pertenue*), bejel (*T. pallidum* subsp *endemicum*), and pinta (*Treponema carateum*) [1]. These are chronic bacterial infections caused by organisms that are morphologically and serologically indistinguishable from *Treponema pallidum* subsp *pallidum*, which is the causative organism of venereal syphilis [2,3]. However, they can be differentiated by the clinical manifestations of their respective diseases, by geographic distribution, and by identification of minor genetic differences. Yaws and bejel affect skin and bones; pinta affects the skin only. Other local terms for yaws include buba, bouba, framboesia, parangi, paru, and pian [6,7]. Other terms for bejel include endemic syphilis, dichuchwa, sklerjevo, belesh, bishel, firjal, and loath. Other terms for pinta include enfermedad azul, carate, cute, and mal de pinto.

Symptoms of the tertiary (late) stages of TREPONEMA DISEASE depend on the organ system affected. Symptoms may resemble those of: So here is the reality that the dr predicted.

- **Advanced HIV infection. So this Hedy - or Dr,Fry links my Teponema to a future diagnosis from 1998.**
- **AIDS-related dementia.**
- **Alzheimer's disease.**
- **Stroke.**
- **Dementia, which is a progressive decline in a person's mental abilities.**
- **Degenerative diseases of the brain and spinal cord (central nervous system).**
- **Coronary artery disease or valvular heart disease.**

<https://rarediseases.org/rare-diseases/syphilis-acquired>

So if you think all this in Malaysia is out there - After going through all this - I said to a FB colleague - these people are just insane - pure madness - her response was these links - and she said boy you are good- you do know.. ?

<https://today.mims.com/topic/one-in-three-malaysians-have-mental-health-problems-as-government-action-plan-to-be-unveiled>

<https://cilisos.my/guess-what-percentage-of-malaysians-have-mental-disorders-its-not-as-low-as-you-think/>

So my being attacked by GOH and all the Doctors refusing me - This dr, Had the injection in his hand - looked at me - and says - No I don't think so - you can get this anywhere. And get out and for that period of 8 hours - i was sent from 1 dr. to the next and denied - medical assistance,
The CHC - did not accept my reality - as whom am I - ? I am invested in my health - and in saving my life - That was the reality and now that Sunway Medical confirmed it lied and denied me - wow- so like I said the chc is so removed from Malaysia - and operate in a privileged position - and therefore discredited my situation - my life and allowed me to die. That is the CHC I know. The Marc Oliver Jean - I was told that perhaps he did not want to miss his T off on the golf course. As rumor has it that Malaysia is one of the easiest postings - and no body does anything here.

Subject: Sorry to barge in like that - VERY PERSONAL & CONFIDENTIAL

To: hedy.fry@parl.gc.ca

This is for the eyes of Dr.Hedy Fry only - its way to VERY PERSONAL & CONFIDENTIAL for anyone else

BTW I only tell you all this - as its what i was told - experienced etc. And as death is on the table - I have no idea what will reach you ? to assist me?

As you can see I am in a very dangerous situation. Not of my doing - I could never have predicted or known about Leptospirosis or that the Malaysians are all pretty dangerous filthy people. From August last year i had to document - report to many different agencies incredible acts of willful damage to the condo I was staying in- all approved by the property management. There was nothing but conflict with the banks stealing your \$, Bus tickets being changed as there saw a foreign name and changed the time in the computer - leaving you a a bogus ticket - etc.

So I was glad to be leaving Malaysia - I had succeeded in my venture that had proven that Toronto's polluted environment had compromised my health and caused many bizarre illnesses.

When I landed in Toronto from Oman - it was meant to be a brief stay and back to Vancouver - but I started getting sick immediately - the collapses - the comas's etc. the vomiting - the swelling of the optic nerve so I had double vision. . The tumors - all very bizarre - I did go into the hospital the first couple of times - as i was scared by all this. But the Toronto hospitals were so crazy - dangerous - wild places. I was placed on a gurney in a hallway - and witnessed - hospital guards attack a bed ridden man who was hysterical - they got into his bed and kneed him - with their legs until he stopped . Toronto is way too brutal.

They then Placed me in a ward - of drug addicts as they said I had to dry out? I asked from what - as I had collapsed at the side of the road - they had to verify I had no drugs in me - I have never done any street drugs - ever - I last had MJ in Trinidad at 16, 1974 ish and after 1 month - when I could not remember my name - I said that's it. I cant do that crap.And al the tests have no drugs - but that is Toronto. Yuck!

I do not smoke and dont drink much as in a glass of wine every 6 months or vodka once a year . Daddy was a severe alcoholic so I never touched it. We were / are the Camacho family - but what I discovered later in life - I removed myself from them. It was not so much discovery but the incredible heart break of a dysfunctional family that had hurt you so much that it was fatal. It was my introduction into Treponema disease and congenital syphilis.

I am or was related to the whose who of Trinidad- The Ferrerias, The Gomes, Camacho , Reids, De montbrun - Barcant - De souza - De Freitas - Rodriguez - da silva etc - Perreias -Price - you name it we - the jardims, the jardines. etc bla bla

Christmas was always fun - we had 200 people over as I lived in Bayshore - near Good wood park, near the kirpalanis - moses - maraj anyway that was then. My mothers revenge on me - was to discredit me - with all my family. She was having an affair with Uncle Max ferreria - her brother in law - and his wonderful wife - befriended me to find out - what i knew - which was a lot - and as i saw my aunt break down - and cry with so much pain - from all this deception - i told her what i knew- i was 19.

I had no idea that all this was going to haunt me for the rest of my life and destroy all my family. Hell hath no fury etc. So when I tell people I have no family I have none - and the injury to my head and jaw - that was deemed fatal by Canadian doctors - was from Jacky - somehow she felt that she had to crucify me. I have told everyone else it was a car crash. I have since attributed her madness to a treponema disease and probably VDRL syphilis - If you think this is bizarre - In seoul - in 2004 - I was walking in Myengdong - a place full of people - when suddenly - a Korean Buddhist priest came up to me and a friend and told my friend in Korean about the great danger I was in from my mother. And that she had done something so bad - that it could kill me.

Again if you doubt me - talk to Lawson as I told him a lot of this kind of stuff. But the reality was that in 1998 - a stranger came to me on the street a young woman - and said - I see what you are going through - I need to send you to the Vatican - I said Portugal as Pope John Paul as he was about to go to Fatima for the beatification of Jacinta and Francisco - so she went to the bank took out - \$3500.00 and i went - Lawson wrote in my medical log - Its seems Cristoph's s illusions pay him cash.

You have to meet Lawson - he is really wonderful - I miss him. I called every year from Toronto sayig I coming - I have to get out of here - but some new calamity would hit. I fled Toronto to save my life - and now OMG Malaysia. Like I said to Dr, David Brule - something or someone really wants me dead.

<https://youtu.be/6oAOcZFYdAO>

Lawson was not big on spirituality or the catholic church. But he said in case what you have is catching - go and hide your catholic medals in my office where i cant find them. And if this miracle thing is real ?

Yes the trauma I experienced catapulted me into a world of lifelong prayer and devotion. To the point that i was flown to Fatima - met the Pope and was allowed to be in the presence of Sister Lucia . The cloistered carmelite nuns I met - and they knew me - praying for my life for 2 years - They were allowed to be free due to the beatification. They freaked me out as there these tiny women about 4'11 speaking in these childish voices as they had been cloistered from the age of 9. And 1 looked at me - and says - you are closer to God that all of us. I said thanks - as that meant i had in deed died -

I moved to Canada in 1980 - went to school -- to university - in Saskatchewan etc - Pre Med - never got far - I just collapsed at 21. Turns out the beginning of my life log battle

with a non diagnosed condition that was discovered in 1993 in Vancouver. Congenital syphilis - By the way my family friends the Boland's- suffered the sudden death of their youngest - healthiest child due to Treponema - 1 minute he was alive and the next dead - a massive coronary. You might have known Dr.Ralph Boland. my uncle is Dr, Vity Gomes. I went back to school later and did much it in Seoul I was there for about 10 years. I am 59 now. BTW - according to that dr. Death by 60 - You really have to talk to Dr,Lawson Baird. I forbid Marc Oliver jean and the CHC - from ever contacting me as - suffice to say there is something seriously wrong with them. *As AuntyOdette will say but Boy what wrong with them - they fell on their head or what?*

There was a massive outbreak in Moruga in 2010 and I was asked to talk to the school about treponema disease. It was deemed " Demon attack" In Vancouver in 1998 - when the septicemia made me vomit - for hours - i did experience glossolalia - but it was attributed to a brain infection., So I had real knowledge to discuss these events - But Tdad preferred the demon story. Why do I tell you all this - because my life ihangs in the balance - If I dont get help - Im a dead man in 60 days - its been 6 months and if you have seen what I have seen and experienced in this body - ? Well - its all about death.

- Not much else was told me about what that meant - except take medicines get Bicyllin and that was that. But it was not. I went on to have several bouts of an unknown illness every 7 to 10 years. in 1998 I almost died due to severe septicemia from rotting bone and teeth. I had started going to the dentists as my teeth were breaking - just shattering in my jaw- the Vancouver dentists discovered i had several fistulas and that my jaw was rotting - and decided as I could not afford the hefty 5000.00 to repair it - and they told me after my 2nd near death they DECIDED - to not help and let my life worsen. A segue to this current event. THE CHC & the Malaysian doctors decided my fate - Let him die.

It was when I was in Korea- teaching that I collapsed. This happens with no warning - Sudden onset. It was again conformed congenital syphilis but I was treated with everything - the implants to my jaw -45,000.00 came from my rich Korean roommate. So my life was saved until the cow bone implanted into my jaw loaded with treponema created the massive illnesses.

The Trinidad History of treponema has demon attacks- maybe you heard of it - but i was called to offer an explanation, But you trinis they love their drama.

BTW - I did discuss this with a neurologist, who was also a ex- Jesuit priest I met in a Seoul party - this aspect of Brain infections - Glossolalia - demons etc. He did say there was a correlation to the medulla oblongata - the mouth to god and its understood that archetypes of God - angels - demons - are attributed to be created with in that region of the brain? And certainly some infections can cause these events to occur - in precisely the manner that was describe in Moruga.

The severity of the Vancouver doctors and their stated desire not to treat me - until I was near death. I have spent years particularly in Toronto where any dentists that saw me - asked if i was a Meth addict - I was and am so shocked - and I have to fight depression - every-time. 1 as its a reminder of jacky - 2- that Toronto is so dangerous with drugs - that doctors with no couth - no decency will bluntly insult you with you must be an addict. I hate drugs - and I hate addicts - which makes me in Toronto - a target - as quiet as I am - the Drug addicts are so ubiquitous.

The anaphylaxis caused my veins etc to shrink.. In Seoul I was a body builder and that body has disappeared due to all these illnesses.

THE CHC in KL has hurt me badly - denying any help and I am sure after you talk with them - you will hear all kinds of crap. They do have discretion and as this is so dangerous - it was decided to do nothing. Plus as I am so bold faced - telling that man exactly what he did to me - he will hate me - but then again what he is going to do kill me ? Goh already did that.

VERY PERSONAL & CONFIDENTIAL - ONLY AS YOU ARE A DOCTOR!

The Leptospirosis has mutated with HIV and is now a deadly killer - at the time of the bone infection in Seoul I suddenly tested positive. for HIV - Meningitis - TB and EB- I was devastated. Hiv was supposed to be from sex - and sure there was a lot of sex. Sorry but the Koreans are wild - and yes it was unprotected - and multiple partners - on the orgy side of life many females not guy on guy but well the girls had multiple partners, at the same time . But I never tested + as well as there was a 2 year period of celibacy - I was too catholic for Korea - and abstained - I have previously been celibate for 9 years - after my bad marriage - and since that at the time false + - I was again and to this day - celibate.

But it came as a blow and reinserted the earlier diagnosis of a 90% of becoming +. But with chelation it all went away. Subsequent tests - had me clean - until the hell that was Toronto. I could not get chelation - and i went to get tested- I discuss it all openly as you see. And they said you are +. I said no way - and over time the + acted really weird - the drugs were a disaster - ad i had every reaction that was listed. They changed it - and the same - but i went on Traditional Chinese meds - and off the drugs - I told the doctor who was so alarmed but not that I was off the drugs bit the fact that my body was doing something unseen before - the other factors were so elevated - that my body was fighting the disease in a manner not seen. Of course they wanted back on the drugs

and I said no - as I was so anaphylactic - and reactionary - and as they said the herbs were doing incredible things - ? However the anaphylaxis got worse and worse - until i was a shut in - ish - so as they kept saying what drugs are you taking - again street drugs - I never have - but they would not believe me - so I said test me for the drugs you gave me - and I was all allergic -

Dr. Hedy you cannot divulge this - as its so private - people in Canada are so strange - I was going to a clinic in Thailand as they state that this infection now is as common as malaria. And with my Unicorn Blood - I wanted to get their perspective and talk to Dr. Lawson Baird on it.

The drugs etc and the hiv was such a mess - yet I was very healthy as you can see from the previous drug tests - the elevated sugar levels was due to the shut in status - Toronto a mess - I have met doctors worldwide now and they say Toronto is 25 years behind all treatments with HIV - ? All I knew was that prior to January 13 2017 i was fine - healthy running the beach - and after that - dead - unable to move etc. Fevers - a blur - I only remember February - a bit if March - April and May. So if the cHC will not help ? What can I do - I did try fundraising but nothing.

The endemic treponematoses include yaws (*Treponema pallidum* subsp *pertenue*), bejel (*T. pallidum* subsp *endemicum*), and pinta (*Treponema carateum*) [1]. These are chronic bacterial infections caused by organisms that are morphologically and serologically indistinguishable from *Treponema pallidum* subsp *pallidum*, which is the causative organism of venereal syphilis [2,3]. However, they can be differentiated by the clinical manifestations of their respective diseases, by geographic distribution, and by identification of minor genetic differences. Yaws and bejel affect skin and bones; pinta affects the skin only. Other local terms for yaws include buba, bouba, framboesia, parangi, paru, and pian [6,7]. Other terms for bejel include endemic syphilis, dichuchwa, sklerjevo, belesh, bishel, firjal, and loath. Other terms for pinta include enfermedad azul, carate, cute, and mal de pinto.

Symptoms of the tertiary (late) stages of TREPONEMA DISEASE depend on the organ system affected. Symptoms may resemble those of: So here is the reality that the dr predicted.

Subject: Fwd: <https://youtu.be/OJQtrB3K-vl>

To: "Grierson, Brynn [PH]" <BGrierson@providencehealth.bc.ca>, hedy.fry@parl.gc.ca

Dear Brynn, The poxing started again. Probably due to the fact that I had no medicine - as they had run out? And as I discovered the 1 reputable hospital in KL - Sunway Medical conformed that they were deliberately misleading me - and denying me medication as I was a foreigner. The Immune specialist - who somehow was very open to me - a Dr.Tan - after I explained about the runaround with Port Dickson Doctors and that my case had become extremely life threatening - I said I was told that it was due to me being foreigner - and they would not want to document me - especially as I was infected with a fatal disease.

He says, understandably we do that as why take the risk? He says why have you not seen me before - ? I was told that you do not exist. He smiles - that's Malaysia for you. - Then I showed him the note stating there was no ACYCLOVIR SOOMG TAB - he says - why did they do that? we have it?

he then says - I cant believe we treated you this way? And then he says where is - and all of my Xrays - notes - Canadian lab reports - where missing from the files. I had

brought them in - many times and emailed them - to all the medical staff to show why I had allergies - etc. Again - he says - I dont know what happened? I said well you confirmed they wanted no paper trail in the event of?

He then says okay times up..

So the fact that I had an infection placed in my bed deliberately. That could kill. Then was assaulted by the same condo people. ? Then all the doctors and hospitals I talked to - went to - denied me any care? Then the CHC playing games with me- for no absolute reason.

That was why I overcompensated with you. All normal events became increasingly abnormal and dangerous- ? I never play games - and due to what happened to me - "this syndrome" which Lawson Baird is now the only medical practitioner that can state that was given as a diagnosis of future illnesses that were so unrelated to me and my life. I am very careful due to the extreme violence of my life in Trinidad. I knew how badly i was injured. The xrays and doctors at Vancouver General finally - verified it as my xrays clearly showed the fractures to my brain and head. He asked me who did this to you. Its as if someone beat you with a 2x4 - until you died. Why are you alive? NO one lives through this. ? I of course - denied it - saying a car accident. He said its okay you do not have to protect them anymore - Who did this to you?

So that is where the syndrome probably came from - the family had a history of Treponema disease - congenital syphilis - and though my mothers family had the Yaws,behel, pinta my father had the VDRL. It stemmed back 3 generations - and is a bane of Trinidad's existence.

Being that I am Portuguese - and that entire family began life in Madeira and Lisbon - circa 1895 - 1912 - a huge history - that led these migrant Portuguese through Guyana and into Trinidad where they accumulated great wealth. Becoming to a degree Trinidad royalty. So this infection with treponema came from my grandmother Gomes - from San Fernando - having been sold to a family in Guyana on a farm and then to my grandfather. She was 16 and he was 28. But then this is 1928. So none of this medical history will come to light until my generation.

And as Portuguese married Portuguese in Trinidad - as I am ccing Dr. Hedy Fry - I am filling in some blanks as my mother always claimed that Hedy and her went to school in San Fernando. The illnesses were therefor in bred. And it came with a smorgasbord of crazy behavior - violent mood swings - temper tantrums - and the bizarre. As the oldest and only surviving male - I became the repository of the family history. The entire family is syphilitic - as you can see from the tests that I did many times - I am and we are all not positive for syphilis. As its not an active infection - but none the less the Treponema disease is serologically identical to *Treponema pallidum*

Bejel, yaws, and pinta are treponematoses (disorders caused by *Treponema* bacteria), as is syphilis. Syphilis is transmitted only by sexual contact, whereas these infections are transmitted by any close contact (sexual or not) with the skin of an infected person—chiefly between children living in conditions of poor hygiene. Bejel may be spread when eating utensils are shared. Also unlike syphilis, these infections are not spread through contact with contaminated blood or from mother to fetus during pregnancy.

Bejel occurs mainly in the hot arid countries of the eastern Mediterranean region, southwest Asia, and North Africa. Yaws occurs in humid equatorial countries. Pinta is common among the natives of

Mexico, Central America, and South America. Pinta is not very contagious. Bejel, yaws, and pinta rarely occur in the United States, except among immigrants from areas of the world where these diseases are common.

Symptoms

Yaws and pinta, like syphilis, begin with skin symptoms. Bejel begins with mouth sores. These symptoms subside, and after a period with few or no symptoms, new symptoms develop.

Why is this important as if - this dr., could predict all my future infections - 90% at risk for HIV - AIDS - CANCERS - ETC - the fact that I somehow got infected by TB- MENINGITIS - EB - and what is SYPHIV - all at once from a cow bone transplant in Korea to fix Vancouver's damage to my jaw. . These things do not happen. The incident rate is almost impossible but it happened.

So after fighting for my life in Toronto - with tumors - coma's - feet bleeding and exposing bone ? And dr's dismissing me - with oh this must be painful?

TO having extremely dangerous rat feces and urine in my bed to again be infected via Bedbugs - parasites and fungus -- delivering directly into my blood deadly pathogens - that mimic plague like symptoms - and result in death if untreated. ? Again what are the odds. The literature I read did implicate that the Treponema disease is 100 % responsible for these infections - that somehow? The original infection - and I cant explain it - magnetizes an attraction to acquire these diseases.

When I asked that dr who delivered the diagnosis why i would get these diseases - / As I will never be anywhere any drug addicts - or gay or anything that would deliver this - to me - He said - MISADVENTURE. And he told Lawson not to bother with me as I was a dead man. ?? I cried for weeks - I destroyed the documents and I made myself live - I told my family - and sent them all the documents - and they disowned me - we never spoke again - They were so horrified by this diagnosis - they killed the messenger - and told all my friends that I was missing in Asia presumed dead and that was 15 years ago. I recently spoke to an old friend - that i had not seen in 30 years in Trinidad - he filled me in - and I told him the story - he says what do you expect man - Your sister and husband - not that smart - they just have \$\$\$ - and you gave them something they will never understand. It may be 2017 but they are still living in 1980. Why do tell you this as people do not believe I have nobody left. **I have nobody left.**

So believe it or not what ever this syndrome is - ? Its destructive and powerful and here I an at 59 - dying of a bizarre disease where everyone I turned to for help - abused me lied - denied - and created sub realities that have hampered my care. That is impossible. Too bad you cant communicate with Dr. Baird . He and I had a special relationship due to the amount of time I had to spend with him. And can confirm everything - if he remembers. And as Toronto doctors beat the shit out of me - figuratively - well it does seem that whatever this is - wants me dead. ? I am just a simple man. Why all this drama?

This video shows the Leptospirosis full blown - since its back and I am trying to leave - if it goes this way - I cant fly - but note the blisters - are a superficial sign as the body - is dying from the infection targeting the eyes - the optic nerve and the Heart - the vagus nerve - as in the past 45 days the 2nd stage - I Had my heart stop 5 times - each night - my chest - I could not breathe and there was fluid in my throat - i literally beat my chest and threw myself on the ground - and passed out ? I guess - So I am terrified of this 3rd go round - its impossible - I am becoming weaker and weaker - and i cannot overcome these crazy doctors in Malaysia - and whatever Marc Oliver Jean has in stock for me? I had to stop him from harming me. What are the odds that this can go from bad to worse and more worse?

Like i said - I have no idea what condition I will be in if I arrive - and as you will do a case study on top of the labs - i am the worst patient ever - the syndrome creates such a smorgasbord of results- that confused everyone - Lawson had to observe me for over an hour and see - the wildest events - fluctuating - pulses - color changes from pallid - to ruddy - my destroyed gums - from the operation that grew so fast - that it went from exposed bone to a closed wound - in a hour. so with this infection and all of its ?? -

Subject: Dear Hedy i have to talk with you in person

To: hedy.fry@parl.gc.ca

You will have received a joint email and it is loaded with information that may overwhelm you . But If I talk to you - As a doctor and a politician you will understand far better than Marc Oliver Jean - what a nightmare of a human being,.

You may be able to relate better to this ordeal as it began in Trinidad many years ago and ended in Malaysia.

Jacqueline Gomes Camacho was my mother. And she used to talk about you from school in San Fernando Trinidad. I did meet you once in Vancouver about 20 years ago.

I can discuss with you openly and confidentially about what has happened and the history - of what was classified as a Syndrome - in 2000 in Vancouver through the Office of Dr. Lawson Baird. Much was not understand at the time but it was diagnosed that my death was imminent and by the most incredible of circumstances. I then decided I would Fight whatever this is and began a healing journey around the world - but the sinister mechanism of the syndrome - which I denied as it was so deadly - proved accurate. And that lead me to Malaysia to a place called Port Dickson - where the inexplicable happened. The filth in Malaysia is incredible - the people are very dirty - but what took place here can never be prepared for.

The condo owner - landlord - house keeper placed dirty filthy bedding that was infused with rat feces and urine - known to cause leptospirosis. I used this blanket at am on the 13th of January - was immediately stung with massive blisters - of a variety of sizes and descriptions - Immediately high fevers - shooting pain - etc. I did try to get medical help but as the story unfolds i was routinely denied . I had some emergency stock of antibiotics and I had blood tests done at the time prior to leaving to verify the state of the body.. I will share most of what I have had done. The last document - is the one that proves i am in a position to die from this. I can only share it as you are a physician and when you see it - well - there will be doubt as to the danger I am in. I danger I could not predict or prepare for.

Plus the tests will also show why I could take this risk at the time - and come to Malaysia. but i was brutally attacked by Mr.goh. The rat infested feces - blanket with

urine - bedbugs - parasites and mold - stung me and entered into my body undiluted the Malaysia Plague. And its deadly. It became Viral Persistent Human leptospirosis - and if i dont get help I am a dead man in Malayalam while running from the mr. Goh who once I retorted has screamed publicly - he will kill me.. Much of this is in the documents that you received - but the actions by Marc Oliver Jean., has complicate this situation to be point that I am scared to death even more.

His actions are deliberate, misleading - and I am so stunned. I am in great shock.

So if you agree - to speak with me - and I can put this into perspective and I did go into extraordinary detail - with the following and with Dr. David Brule who witnessed all that I have sent you.

If I write more - I may offend you - as its a lot. And you are busy. And i cant be misunderstood any further

Subject: Fwd: Dear Hedy i have to talk with you in person

To: cnn.feedback@cnn.com, anderson.cooper@turner.com

If it bleeds it leads?

Dear Anderson Cooper and CNN - I am in Malaysia - stranded -infected with a deadly disease intentionally by a condo owner - who also has publicly claimed he is going to murder me -

The disease is known as Viral Persistent Human Leptospirosis - its now in its fatal stages - The Hospitals in Malaysia refused to treat me - lied - misled me for several months - then the Canadian High Commission did the same - it seems that Canada wants the world to know that its vastly humane - for the refugees - great optics - but if you are a canadian that was attacked by a biochemical - "weapon" you are nothing. But collateral damage - so it seems I may indeed die from this ?

But the world does need to know what the Malaysians are doing - what the Malaysians hospitals and doctors are doing - to Foreigners - and how the CHC decides to deal with Canadians who are just visitors that are hijacked and in the end it will be murder.

Organ failure, internal hemorrhaging, and death can result if the bacterium infects the liver, kidneys, and other major organs.

Care should be taken to differentiate between PHL as detailed here, which is a long-term but essentially transient condition, and persistent carrier-phase leptospirosis where the subject has little or no symptoms but remains infected with the bacterium and in some cases remains infectious. Carrier-phase infection is almost unheard of in humans though is prevalent in many animals. PHL, in contrast, is possible in all species.

Dear Prosecutor of the International Criminal Court YOUR HONOR – Fatou Bensouda Oude Waalsdorperweg 10 2597 AK, The Hague The Netherlands.

As you can see – I am in real pain – and I did share a lot of information. But it does show that I have contacted all these people and my life worsened. I really need your assistance.

Thanks

Christopher De Caemichael

NRTI/NNRTI Drugs	Fold Change ¹	Cut-off ²		Resistance Analysis ³
Zidovudine (Retrovir)	1.2	1.5	11.4	SUSCEPTIBLE
Lamivudine (Epivir)	47.2	2.1	4.6	RESISTANT
Didanosine (Videx)	1.2	0.9	2.6	REDUCED RESPONSE
Stavudine (Zerit)	0.8	1.0	2.3	SUSCEPTIBLE
Abacavir (Ziagen)	1.5	0.9	3.5	REDUCED RESPONSE
Emtricitabine (Emtriva)	39.8	3.1		RESISTANT
Tenofovir DF (Viread)	0.7	1.0	2.3	SUSCEPTIBLE
NRTI/NNRTI Mutations ⁴ : 70wt/R, 184V				

NNRTI Drugs	Fold Change ¹	Cut-off ²		Resistance Analysis ³
Nevirapine (Viramune)	43.1	6.0		RESISTANT
Efavirenz (Sustiva, Stocrin)	27.0	3.3		RESISTANT
Etravirine (Intelecle)	0.9	3.2	27.6	SUSCEPTIBLE
Rilpivirine (Endurant)	1.0	3.1		SUSCEPTIBLE
NNRTI Mutations ⁴ : 103N				

PI Drugs	Fold Change ¹	Cut-off ²		Resistance Analysis ³
Indinavir/r (Crixivan)	0.9	2.3	27.2	SUSCEPTIBLE
Nelfinavir (Viracept)	1.2	2.2	9.4	SUSCEPTIBLE
Saquinavir/r (Invirase)	0.7	3.1	22.6	SUSCEPTIBLE
Fosamprenavir/r (Lexiva, Telzir)	0.8	1.5	19.5	SUSCEPTIBLE
Lopinavir/r (Kaletra)	0.8	6.1	51.2	SUSCEPTIBLE
Atazanavir/r (Reyataz)	0.7	2.5	32.5	SUSCEPTIBLE
Tipranavir/r (Aptivus)	0.8	1.5	7.0	SUSCEPTIBLE
Darunavir/r (Prezista)	0.6	10.0	106.9	SUSCEPTIBLE
PI Mutations ⁴ : 10I				

This nucleic acid amplification, sequence-based test was developed and its performance characteristics determined by the BCCIE Research Laboratory. US Clients only: This test does not require premarket review by the US Food and Drug Administration and has not been approved by the FDA. The laboratory is certified under CLIA '88 to perform high complexity clinical laboratory testing. This test is used for clinical purposes.

1. Predicted Fold Change in 50% Inhibitory Concentration (IC50), relative to susceptible reference virus based on a large database of genotypes and phenotypes (Version CFE-5.0).
2. Cut-off values for maximal and minimal clinical response (Clinical Cut-Off) or for normal susceptibility range in vitro (Biological Cut-Off). Biological Cut-Offs are printed in italic.
3. Resistance Analysis based on the magnitude of the Fold Change relative to the Clinical or the Biological Cut-Offs.
4. Mutations indicated are those reported on public lists (ANRS, Stanford, IAS-USA) or by drug development sponsors.

For more information on these results and their interpretation, or to suggest how to improve this report please contact the lab at (800) 517-1119 or email prharrigan@cfenet.ubc.ca
