First of – I am a Canadian here in Malaysia on holiday. A holiday that became a disaster. In under 4 months I will be dead. I can't it seems get help. I have a blog and I am attaching all my files to try and keep the pieces together. I also wrote in a few languages to throw of – as I am still in Malaysia the people that did this to me and then also threatened to Murder me. This was on May 11<sup>th</sup> 2017. And certainly the blog has been viewed hundreds of times in Malaysia and Singapore. Indicating that they are following me. I am asking for help as the situation is Violent – Corrupt and I will die with no assistance and I have asked the normal routes and the results were astoundingly negative. It seems that even Canadian officials – the CHC in Kuala Lumpur – the Office the Prime Minster. Justin Trudeau is great – his staff ? I do at this time have a load of documents and daily I try to sort out what I can do- I am so ill – that it's impossible to understand being made better.

I am in a dastardly predicament. I am in Malaysia – and was deliberately infected with Human Leptospirosis. Rat fever a dangerous often Fatal – infection. This was placed in my bedding – and on January 13<sup>th</sup> 2017- at 3am. I used it and then my life changed forever. I was bitten and stung by a wild cornucopia of Bugs, parasites and fungus. I immediately cried out for help. Contacting Canada, my doctor and as I had some emergency antibiotics – I started them in an hour I was covered in boils and all sorts of poxes and in pain and fevers. And violently ill – and never recovered in fact its now Viral persistent human leptospirosis. Canada says find local help. That turned into a nightmare – I have collected all the documentation and I went to every Klinik in this town Port Dickson, Malaysia. I called

- ***THIS IS MANSLAUGHTER – MURDER OF A CANADIAN VIA (1) Mr.JACK GOH (2) THE MALAYSIAN MEDICAL SYSTEM REJECTING TREATMENT AND STATING WE DO NOT LIKE TO TREAT VISITORS TO MALAYSIA (3) CHCKL – SABOTAGING MY CASE – WILLING MALAYSIAN GOVERNMENT TO IMPRISON AND OR BEAT ME AS PER MARC-OLIVER JEAN – VICE COUNSEL – THE PMO office JUSTIN TRUDEAU– OTTAWA – DR.HEDT FRY – MP VANCOUVER – HUMAN RIGHTS – THE RESULT IS MY DEATH – AND OR PERMANT LONG TERM INJURY AND SUFFERING.***

that did not work as they spoke no English. I then texted – I facebooked – as I had to find specific vaccinations and meds. I did have a list from Canada and a script that they could use. However no one wanted to assist. At that time January 13<sup>th</sup> – onwards – I was too ill and fevers – and all kinds of horrific poxes were forming and reforming. I did discover that it was the landlord brother – A Mr. Goh that had placed the beds was the delinquent, alcoholic brother of these Singapore and Malaysian Chinese Goh family.

I did not know the nature of the infection as per rats until March 10 2017.

When I threw the offending – dirty bedding into a bucket of hot water – and suds – these dramatic – cinnamon colored turds floated to the surface. I at the time thought – blood clots – human menses, bad enough. When I saw the same turds in the bed – as I moved out – I realized that my predicament was much worse. This is a Malaysian Plague. And I from January 13- to February 26 was basically so out of it.

The infection made me blind – extremely light sensitive – weak- septic – damaged my heart. As I made the rounds of all these doctors- I was refused any medication and all stated if this was indeed Leptospirosis you are a dead man. I intensified my search repeatedly calling the 1 by reputation but not in reality medical center for assistance – As all other more local hospitals said they did not have the vaccines or the antibiotics. All in fact – 3 turned me down upon seeing me. Told me to get out and go somewhere else. 2 gave me grudgingly one shot – and emailing me telling me to go somewhere else. 1 Dr, Vijay took pity and said I can give you or try some stuff – but I cant treat you. ? He said as I asked why, You are a foreigner – we don't want to take any risks – and the paper work we don't want to do.

I finally got through to Sunway Medical Clinic and got a range of? Antibiotics – etc. Information grudgingly given and was told that as they had no stock. (for me) By this time I had been infected for 3 months – in April the bacteria became a virus – and persistent and I was covered in a rash so severe – I was blistered and burnt – internally and externally and it took 45 days to heal.

- Backstory - The sicker I became I realised I was in greater danger – that this virus was now mutating – I had a problem in the past with these types of Zoonotic or Treponema – diseases. That I had been exposed to in childhood and it was confirmed by the Heart Specialist here that as I was denied or treatment was late in getting to me. That I had sustained internal damage that can be fatal. In 1998 in Vancouver after the untreated infection for 30 years had destroyed my jaw and teeth. A specialist – diagnosed me with a syndrome and actually told my Doctor – in Vancouver – that don't bother treating him – he is a dead man.
- He then gave me a 25 page document of the following all fatal and dangerous – illness and diseases I will acquire. They were so severe – it was also congenital – I made copies and sent it to all my family, Worried as we are infected – all had children and we needed to know all this.

**Contacts: Dato' Wira Syed Ismail Syed Azizan, Director, Commercial Crime Investigation Department Bukit Aman Blok G, Kompleks Pejabat Kerajaan, Bukit Perdana, Jalan Dato' Onn, 50502 Kuala Lumpur. PA: Ms Khatijah, Tel: 03-2616 3701, email: dir.ccrime@rmp.gov.my**

- My family never spoke to me after that – it was so frightening – that we only starting having small Xmas conversations – about 10 years later. As the symptoms appeared in their children they stopped all together. My family out of fear- responded by telling people I had died.

It was that severe and a death sentence – especially for me – as it turned out women can carry the gene unexpressed but the males will express it and suffer. As these diseases are endemic - and the family lived still in the Caribbean and other exotic areas and I travelled extensively in Asia - and the Middle East. Essentially I had to be careful and I was – as Toronto Canada also turned into a health nightmare. Forcing me to go away for 1 year or less – to get rid of anaphylaxis. I came to KL April 3<sup>rd</sup> 2016, and left 2x for Thailand and was planning to go Thailand – then to Vancouver. All this in February 2017 and to be in Vancouver in May or June.

So Malaysia at 58 – 59 was to just get a chance to recoup. And plan a better health and living arrangement. As death from anaphylaxis was a reality.

So careful I was – I stayed in the apartment complex – Malaysia was very boring – very hot and so I though just write and paint. But just get better.

Port Dickson was just a brief stop – of about 6 weeks but that all changed. With this dangerous infection. As it has mutated – I have to have very specific – tests – to determine the type of infection. I was infected with 3 different insect – parasite – mold vectors that carried the Rat Feces – Urine and the Leptospirosis into my body. All of these for me are deadlier than average.

But the Gohs could not leave me alone – it's a small town and though I hid – it has 1 main road – so I could never be on it – My caution was warranted as Goh did see me and threaten to kill me – in front of security guards – I went home and collapsed. I realized that I could never get better – with this constant threat. I had no car and would just walk to stores for groceries. And to the beach – as the sea water is crucial for Leptospirosis – and as well the anaphylaxis. As the Dr., said just take the antibiotics - as much as you need – and get out of PD. Also the Security guards said the police want me to leave ASAP as they can't touch Mr. Goh unless I hire a lawyer and or he kills or injures me.

Well that was my plan – but I was too sick and to get better I needed the medication and PEACE – I called CHC in KL and got a baffling response – sure they would provide me with a plane ticket as it was an emergency – and I had to PROVE – I had doctors in Vancouver to look after me. ?

I had contacted them my Vancouver doctors – in March and was told just get here. But as this Vice counsel needed to know details. ? So I had to then send updates –pictures – and give a more complex picture of the illness that was so life threatening. I was also at the first communication with the Vice Counsel – heavily poked – Fevers that created rivers of sweat – and so ill – that I knew I could not travel that soon only after I was better – I could not get on a plane for a 15 hour flight when I had not slept in weeks was bathing every 4 hours – itching – etc and the heart. I required exercise and diet with the heart drugs and every time I was out – I was followed – harassed.

But also the Vice Counsel was a bit strange. He laughed as I told him my story – I was shaking from the stresses the illness – the murder – but the infection is murder – and as I said – I had over stayed – due to illness .So he says – YOU ARE GOING TO BE ARRESTED AND FINED. And laughs - again.

I just about fainted. I told him what I knew from immigration was – bring us all your documents that proved illness and you are free to go. Also remember during this time – I was blinded seeing 4 of everything – So I collapsed – it took weeks to get better – I had provided the 1 name – in Toronto – a dr, David Brule and I was told that as my doctors were not linked in the same hospital – they would not share information. I offered – to send a letter to send – info – and the Hospital refused – even though my doctor is an attending in the Hospital. I was forced to administrate and administrate – and still no help.

On June 2nd – Sunway medical – confirmed that they had deliberately blocked my treatment and care. Stating that they had no medication that I was asking for since March 2017 or any doctors – that supported my situation. They also told that to the CHC-

- At the emergency Clinic I had met with their Dr. for infectious disease – he was surprised we had not connected in the 6 months - ? I said I was told you do not EXIST and that Sunway – does not treat Leptospirosis - or have Meds Dr. Tan was stunned – who said that – I showed him the latest letter –
- He reads – what do they mean – we have no meds? We have it – I treat Leptospirosis – and where are? I looked at my file – every one of my supporting documents were not there.
- I said – So I was told in Port Dickson – that local doctors don't want to treat expats or visitors for fear of?
- ***Dr. Tan states – Yes its true Malaysian doctors are afraid to treat visitors. So I said that by lying to me and preventing me – from getting medication and assistance that my case worsened my heart was damaged and the infection has gotten to a point that yes – I can die from this soon.***

I contacted Dr. Hedy Fry. Dr. Lawson Baird- Saint Paul's Hospital - the CHC – and now your office in 2 months I am a dead man- the disease is moving rapidly. CHC will do nothing for me. It seems and Hedy is too busy and I provided her with very confidential information of my health. As she was a doctor and also to humanise myself to her – not quite a stranger – as my mother and her family seem to be acquainted with Dr. Fry.

The CHC seems to be quite ....? Distant cold – unsupportive? – Not responding at all – knowing I will die – There is very little \$- I had budgeted carefully but instead I am running around spending \$ on Drugs that no longer work etc. So \$ is an issue – and sorry being so sick – and infected.. Today I could not for an hour remember my computer passwords. I had 0 memory. And it's all in the disease literature. So Malaysia has thus far – infected me with a deadly disease. I can't get the \$ I have spent – my life is threatened – my body is dying – and I need help ASAP.

As the vice counsel stated in laughter – you seem to be writing everybody... ? Im not sure what death – infection – murder or ??? So I thought – I must make people aware and if I die – well – I tried.

**Contacts: Dato' Wira Syed Ismail Syed Azizan, Director, Commercial Crime Investigation Department Bukit Aman Blok G, Kompleks Pejabat Kerajaan, Bukit Perdana, Jalan Dato' Onn, 50502 Kuala Lumpur. PA: Ms Khatijah, Tel: 03-2616 3701, email: dir.ccrime@rmp.gov.my**

- ***THIS IS MANSLAUGHTER – MURDER OF A CANADIAN VIA (1) Mr.JACK GOH (2) THE MALAYSIAN MEDICAL SYSTEM REJECTING TREATMENT AND STATING WE DO NOT LIKE TO TREAT VISITORS TO MALAYSIA (3) CHCKL – SABOTAGING MY CASE – WILLING MALAYSIAN GOVERNMENT TO IMPRISON AND OR BEAT ME AS PER MARC-OLIVER JEAN – VICE COUNSEL – THE PMO office JUSTIN TRUDEAU– OTTAWA – DR.HEDT FRY – MP VANCOUVER – HUMAN RIGHTS – THE RESULT IS MY DEATH – AND OR PERMANT LONG TERM INJURY AND SUFFERING.***

So as you are aware Malaysia is very dangerous and for unknown reasons – Canada is? not responding in any way that will save my life – I am at times out of mind with worry – fear – illness – disaster.

### **The disease in Red are the ones I am infected? With.**

- **Hantavirus Pulmonary Syndrome expanded.**
- **Hemorrhagic Fever with Renal Syndrome collapsed.**
- **Lassa fever collapsed.**
- **Leptospirosis collapsed.(MALAYSIA EPIDEMIC)**
- **Lymphocytic Chorio-meningitis (LCM) collapsed.**
- **Omsk Hemorrhagic Fever collapsed.**
- **Plague collapsed.**
- **Rat-Bite Fever collapsed**

#### **A question-**

What is really wrong with this - is that in over a month of my reporting to Canadian Hc- the PM office - Hedy Fry - with such a serious condition no one responded - After - MOJ -VC -CHC spoke to my Canadian doctor in Toronto- while I was following up with Vancouver - plus blind so i had to stop - and nothing - nary a word - with a massive infection deadly infection - threats of murder - and certain death due to Malaysian doctors decision to lie to me and discriminate against the treatment - by the fact that i was a visitor - - lead to the diagnosis - of its a fatal disease to reality - and Canada - decides to this reality. Are there Human rights to protect me - I have to make myself eat - im losing the will to live as the disease eats its way through my body - horrific neurological developments - makes no since - is there a rule that victims must die after - you ask for a rescue and help to get out

of a bad situation. ? *CRISTOPH DE CAERMICHAEL*

Persistent Human Leptospirosis

**Contacts: Dato' Wira Syed Ismail Syed Azizan, Director, Commercial Crime Investigation Department Bukit Aman Blok G, Kompleks Pejabat Kerajaan, Bukit Perdana, Jalan Dato' Onn, 50502 Kuala Lumpur. PA: Ms Khatijah, Tel: 03-2616 3701, email: [dir.ccrime@rmp.gov.my](mailto:dir.ccrime@rmp.gov.my)**

I had contacted Dr. Lawson Biard and I kept telling him the symptoms were repeating themselves in a rash every 3 weeks after the Rocephin interjections – the question of any retro viral or bacterial properties and could return.. The answer provided was yes and it's called Persistent Human Leptospirosis

Due to the type of my attack and the presences of many pathogen bearing vectors, Parasites, bed-bugs and fungus. I have developed Persistent Human Leptospirosis. Plus in keeping with my history – of these infections – I have always it seems presented with a longer than usual healing time – as well as treatment always began late – weeks months – years – after – the infection began – resulting in a longer than average recuperation time and a long than average aggressive treatment plan.

Humans do not have immunity to the leptospirosis bacteria. 10% of patients go on to develop long term PHL. Treatment of PHL is an unexplored area. There is no defined reason for this continuation of symptoms. Some of the effects are sequelae (lasting damage to the body that takes time to heal) left after the bacteria have been removed, and a compromised immune system from other zoonotic exposures.

- 
- Organ failure, internal hemorrhaging, and death can result if the bacterium infects the liver, kidneys, and other major organs.
- Care should be taken to differentiate between PHL as detailed here, which is a long-term but essentially transient condition, and persistent carrier-phase leptospirosis where the subject has little or no symptoms but remains infected with the bacterium and in some cases remains infectious. Carrier-phase infection is almost unheard of in humans though is prevalent in many animals. PHL, in contrast, is possible in all species.
